Handbook for Effective Supervision of Instruction Ross Linn Neagley, Norman Dean Evans, 1980 *The Foreman/Supervisor's Handbook* Carl Heyel, 2012-12-06 The Foreman Supervisor's Handbook is offered as a comprehensive and authoritative text which presents the kind of practical information the foreman or supervisor needs in order to be effective on the job. It completely revises and updates The Foreman's Handbook, a work which through four previous editions has become the standard text in its field. The term foreman supervisor in the title of the new edition was decided upon by the editors despite a reluctance to tamper with a well established name in recognition of a change in usage which has come about over the years. Supervisor is now more generally used in industry for the first level of management and is especially appropriate since the emerging role of women in supervisory and higher positions has rendered the earlier gender specific term less properly descriptive. Moreover, although the orientation of the book is to manufacturing operations, the principles and techniques discussed have wide application in office operations where the term supervisor is the designation universally used. To retain continuity with the previous editions, the compromise term foreman supervisor was adopted. As in previous editions, each chapter is written by an authority in the subject covered. Each moreover stands on its own feet, i.e. it can be read as a separate article independent of preceding or succeeding chapters.

The Supervisor's Handbook John J. Aluisse, University of North Carolina at Chapel Hill. Department of Family Medicine, 1994 *Becoming an Effective Supervisor* Jane Campbell, 2013-08-21 A practical hands-on workbook. Becoming an Effective Supervisor neatly fills the gap in supervision resources available to mental health practitioners. The workbook is designed to help clinical counselors and therapists create effective supervision programs of their own and to address the individual needs of their students. The leading contemporary models of supervision are discussed as well as the necessary components of a successful supervision curriculum. A framework is then provided for counselors and therapists to develop a personalized and highly effective supervisory style to implement with their own students. The unique exploration exercises in each chapter allow readers to actively integrate the information provided and to apply these lessons and skills to their own supervisory experiences. Students too will benefit from her concise examination of the theories, applications and goals of the supervision process. Along with a discussion of the ethical, legal and multicultural issues faced by clinical supervisors, practical analyses and applications ensure that this book will be a valued addition to any clinical counseling or therapy library.
