Augmentative and Alternative Communication for Adults with Aphasia: Science and Clinical Practice Rajinder Koul, 2012-11-02 *Augmentative and Alternative Communication for Adults with Aphasia* is a text written for practising clinicians, undergraduate and graduate students, assistive technologists, and other stakeholders who are interested in learning more about the communication needs and options for people with aphasia. The book aims to: Provide an overview of aphasia and various treatment approaches; Provide a comprehensive review of AAC intervention approaches for persons with aphasia; Evaluate the efficacy of AAC intervention approaches that use technology such as speech generating devices and non technological AAC approaches as part of a treatment package; Examine the ways in which techniques and strategies can be applied to persons with aphasia; Better understand how both direct stakeholders i.e. persons with aphasia as well as indirect stakeholders e.g. close and extended family members, friends, paid caregivers feel about the effectiveness of AAC intervention in persons with aphasia. *Embedding Evidence-Based Practice in Speech and Language Therapy* Hazel Roddam, Jemma Skeat, 2010-04-05

Like all health professionals, speech and language therapists (SLTs) need to keep themselves up to date with the research evidence base that is relevant to their field of practice and be able to show how this contributes to their clinical decision making. However, it is not always clear to practitioners how evidence based practice (EBP) can be properly embedded in their day to day activities. In this valuable book, Hazel Roddam and Jemma Skeat present a wealth of instructive examples by SLT contributors from around the world showing how clinicians, educators, and researchers have risen to the EBP challenge. Embedding evidence based practice in speech and language therapy showcases the creative ways that SLTs are developing knowledge and skills for EBP, creating contexts that support the use of evidence in practice and working towards making evidence easily accessible and usable. It includes real life examples of how SLTs have encountered a clinical problem or
