Ephemeral/portable Architecture Robert Kronenburg, 1998 *Ephemeral/portable Architecture* Robert Kronenburg, 1998 *Ephemeral/portable Architecture* Robert Kronenburg, 1998 **Ephemeral/portable Architecture** Robert Kronenburg, 1998 *Ephemeral/portable Architecture* Maggie Toy, 1998 Portable Architecture Robert Kronenburg, 2008-05-16 This book discusses the forerunners present context and technology of portable architecture It documents numerous international examples organized by areas of application and offers a broad array of suggestions for practical design Architecture, City, Environment Koen Steemers, Simos Yannas, 2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry University of Cambridge **Ethics and the Practice of Architecture** Barry Wasserman, Patrick J. Sullivan, Gregory Palermo, 2000-03-07 From theory to practice a unique well rounded guide to ethics for today's architect How does an architect assist a community in evaluating alternative designs Resolve a dispute with a contractor Take into account a project's impact on the natural environment When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent It demands a solid understanding of the ethical issues that lie at the heart of architectural practice Ethics and the Practice of Architecture offers a complete broad based introduction to this crucial subject First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today Ethics and the Practice of Architecture is an excellent resource for present and future architects in all areas of the field **Transportable Environments 3** Robert Kronenburg, Filiz Klassen, 2006 An overview of structures designed to be mobile their uses and the principles involved in their design including a consideration of the wide range of applications in which they can be found

Architecture in Motion Robert Kronenburg, 2013-08-15 The idea that architecture can be portable is one that grabs the imagination of both designers and the people who use it perhaps because it so often forecasts a dynamic and creative solution to the complex problems of our contemporary mobile society while at the same time dealing with issues of practicality economy and sustainability Architecture in Motion examines the development of portable transportable demountable and temporary architecture from prehistory to the present day From familiar vernacular models such as the tent mobile home and houseboat to ambitious developments in military and construction engineering all aspects of portable building are considered Building on his earlier works Portable Architecture and Houses in Motion Robert Kronenburg compares traditional forms of building current commercial products and the work of innovative designers and examines key contemporary portable buildings to reveal surprising exciting and imaginative examples He explores the philosophical and technological issues raised by these experimental and futuristic prototypes By understanding the nature of transitory architecture a new ecologically aware design strategy can be developed to prioritise buildings that tread lightly on the earth and still convey the sense of identity and community necessary for an established responsible society This book provides a unique insight into this pivotal field of design

Transportable Environments Robert Kronenburg, 2013-04-03 Transportable Environments explores aspects of the historical and theoretical basis for portable architecture and provides an insight into the wide range of functions that it is used for today the varied forms that it takes and the concerns and ideas for its future development Written by a team of international commentators this volume provides a state of the art survey of this specialist area and will be of interest to a wide range of professionals across the construction and design industries

An Anthology of Structural Morphology Rene Motro, 2009 The structural morphology working group of the International Association for Shell and Spatial Structures founded in 1991 has helped to launch several international seminars newsletters and specific sessions of international conferences devoted to structural morphology This book contains papers that have been selected either for their fundamental contribution to structural morphology or for their actual pertinence in the field Polyhedral geometry double curved surfaces biological structures foldable systems form finding techniques and free form design are some of the topics included in the contents of this book The work presented in this book is the result of more than 15 years of study by researchers engineers mathematicians and architects who thought that conceptual design would benefit from the association of separate fields geometry biology and mechanics in a holistic process Every aspect of structural morphology is illustrated by one or more chapters of the book As far as we know there are few books OCo perhaps none OCo that gather all aspects of structural morphology even if for instance there are many books on the geometry of polyhedra Furthermore readers will have access to a large list of selected references which will open the scope of their bibliography

Type & Typography Phil Baines, Andrew Haslam, 2005 Providing an essential grounding for both students and professionals this text takes readers through every aspect of typography from the history of language and writing systems to the invention of moveable type and the evolution of the digital systems of today **Campsite** Charlie Hailey, 2008-06-01 Camping is perhaps the quintessential American activity We camp to escape to retreat to find ourselves The camp serves as a home away from home where we might rethink a deliberate life We also camp to find a new collective space where family and society converge Many of us attended summer camps and the legacies of these childhood havens form part of American culture In *Campsite* Charlie Hailey provides a highly original and artfully composed interpretation of the cultural significance and inherently paradoxical nature of camps and camping in contemporary American society Offering a new understanding of the complex relationship between place time and architecture in an increasingly mobile culture Hailey explores campsites as places that necessitate a unique combination of contrasting qualities such as locality and foreignness mobility and fixity temporality and permanence and public domesticity Camping methods reflect the rigid flexibility of the process leaving home arriving at a site clearing an area making and then finally breaking camp The phases of this sequence are both separate and indistinct To understand this paradox Hailey emphasizes the role of process He constructs a philosophical framework to elucidate the placefulness or sense of place of such temporary constructions and provides alternative understandings of how we think of the home and of public versus private dwelling spaces Historically camps have been used as places for scouting out future towns for clearing provisional spaces and for making semipermanent homes away from home To understand how cultures of camping develop and accommodate this dynamic mix of permanence and flexibility Hailey looks at three basic qualities of the camp as a site for place making as a populist precursor for modern built environments and as a method Hailey's creative and philosophical approach to camps and camping allows him to construct links between such diverse

projects as the philosophers camps of the mid nineteenth century the idiosyncratic camping clubs that arose with the automobile culture in the early 1920s and more recent uses of campsites as temporary housing for those displaced by Hurricane Katrina In Campsite Hailey makes a singular and significant contribution to current studies of place and vernacular architecture while also reconfiguring methods of research in cultural studies architectural theory and geography
