**Access to Information Technology and Justice A Critical Intersection** as the first ever book length examination of the use of technology to expand access to justice in the United States highlights an emerging paradox wherein the technological transformation that has created an increasing array of legal self help resources and services is also creating barriers to access for disadvantaged individuals Those who cannot read those who do not speak the English language those who are unfamiliar with the law and those with limited digital literacy skills all find themselves at a fundamental disadvantage The legal community has only begun to examine whether these resources and services are in fact meeting the needs of struggling self help users This book builds upon existing work in this area by undertaking an in depth exploration of how information and communication technologies are changing and failing to change the legal in formation landscape for those who most need this information Drawing upon the ongoing collaborative efforts of legal aid organizations
