For centuries thinkers have grappled with the mystery of how humans first formulated the notion of equality The species is quite territorial and according to history has demonstrated a violent streak How could such a creature have developed the peaceful impulse to ensure everyone gets their fair share Some have surmised that equality was a last gasp measure the guarantee of peace to avert self annihilation However a closer examination of the phenomenon across the existence of Homo sapiens illuminates a naturalistic solution to the puzzle Lantz Miller traces the early advancements of our species to argue that rather than concocting equality to forestall self annihilation it was forged through a lived condition of freedom over hundreds of thousands of years Bringing together insights from both philosophy and anthropology [The Roots of Equality](#) Anthropological and Normative Sources investigates how our foraging ancestors came to thrive in egalitarian communities without sacrificing autonomy along the way **The Monks and Me** Mary Paterson, 2012-09-01 Death can be a destabilizing force And when it touches you closely you must somehow discover a way to find and rebuild your secure home popular yoga instructor Mary Paterson writes With the death of her father she felt as if she had no place to stand She had lost her home Paterson's response to this life crisis was to embark on a pilgrimage to Plum Village the retreat of Nobel Prize nominated Buddhist monk Thich Nhat Hanh This wonderfully frank and funny chronicle of her 40 day sojourn offers readers the 40 Buddhist precepts that she learned The primary theme is the necessity of discovering how to take refuge or find a permanent home within ourselves without taking oneself too seriously With chapters such as The Lesson in a Bad Fish The Man Who Nicked My Headphones How a Monk Washes His Face and How Not to Be Sneaky this lyrical wise and witty personal journey book is inspirational and a joy to read Paterson's sensibility is grounded realistic and engaging [American Society](#) Talcott Parsons, Giuseppe Sciortino, Jeffrey C. **The Routledge Handbook of Commodification** Elodie Bertrand,Vida Panitch,2023-12-04 Some goods are freely traded as commodities without question or controversy For other goods their commodification their being made available in exchange for money or their being subject to market valuation and exchange is hotly contested Contested commodities range from labour and land to votes healthcare and education to human organs gametes and intimate services to parks and emissions But in the context of a market economy what distinguishes these goods as non commodifiable or what defines them as contestable commodities And why should their status as such justify restricting the market choices of rationally consenting parties to otherwise voluntary exchanges This volume draws together wide ranging interdisciplinary research on the legitimate scope of markets and the kinds of goods that should be exempt therefrom In bringing diverse answers to this question together for the first time it finally identifies commodification studies as a unique field of scholarly research in its own right In so doing it fosters interdisciplinary dialogue advances scholarship and enhances education in this controversial important and growing field of research Contemporary theorists who examine this question do so from across the disciplinary spectrum and ground their answers in diverse scholarly literature and divergent methodological approaches Their arguments will be of interest to scholars and students of philosophy economics law political science sociology policy feminist theory and ecology among others The contributors to this volume take diverse and divergent positions on the benefits of markets in general and on the possible harms of specific contested markets in particular While some favour free markets and others regulation or prohibition and while some engage in more normative and others in more empirical analysis the contributors all advance nuanced and thoughtful arguments that engage deeply with the complex set of moral and empirical questions at the heart of commodification studies This volume collects their new and provocative work together for the first time

*Social Justice and Political Change* David Mason,2018-04-17 Analysis and debate about economic and political justice rarely involves research on the views of the common person Scholars often make assumptions about what common people think is fair but for the most part they confine their thinking to a single country and argue on rational or moral grounds with little supporting

empirical data Social Justice and Political Change involves the collaboration of thirty social scientists in twelve countries and represents broad ranging comparative research The book grows out of a collaborative study of public opinion about social justice Though conceived prior to the revolutions that swept Central and Eastern Europe in 1989 the ISJP did not put its survey into the field until the summer of 1991 in a new climate of open international exchange in social research Employing common methods of data collection and within the limits of translation identical survey instruments the ISJP investigated public opinion in seven newly emerging post Communist countries and five of the world's most influential capitalist democracies with special sensitivity to divergencies in the newly united Germany Among the themes addressed by the volume's distinguished contributors are the views and beliefs of citizens in the post Communist states on the transition to market economies and parliamentary democracy the role of ideology in legitimating inequality the structural determination of beliefs about justice the processes that shape individual level evaluations and the major implications of public opinion and mass participation in the democratic process

**Communities of Individuals** Michael J. R. Cross, 2017-10-05 This title was first published in 2001 This book examines the liberal communitarian debate from a new perspective Communitarians argue that liberal theory neglects the significance of communities for the lives of their members An examination of that argument reveals that there are deficiencies in the communitarian account of community Identifying and remedying those deficiencies is the key concern of this book Uniquely this book addresses the deficiencies using Sartre's anarchist theory derived largely but not exclusively from an interpretation of the Critique of Dialectical Reason Sartre champions the individual yet criticises liberalism The tension arising from these two apparently disparate positions makes for a fruitful argument enhanced by the connections made with Aristotelian and feminist theory Hobbes and Rousseau Finally a method is developed for inquiring into the nature of associations which it is argued should interest communitarians concerned to avoid deficiencies in their account of community

**Critical Pluralism, Democratic Performance, and Community Power** Paul Schumaker, 1991 Who governs is a central question in political science Typically political scientists address this question by relying upon either empirical analysis which explains existing political practices or normative analysis which prescribes ideal political practices

*Good Citizens* Thich Nhat Hanh, 2008-06-14 A Zen monk and peace activist shares his vision for creating a peaceful globalized world through nonviolent communication and a shared moral code In *Good Citizens* Thich Nhat Hanh lays out the foundation for an international solidarity movement based on a shared sense of compassion mindful consumption and right action Following these principles he believes is the path to world peace While based on the basic Buddhist teachings of the Four Noble Truths and the Eight Fold Path Thich Nhat Hanh boldly leaves Buddhist terms behind as he offers his contribution to the creation of a truly global and nondenominational blueprint to overcoming deep seated divisions and a vision of a world in harmony and the preservation of the planet Key topics include the true root causes of discrimination the exploration of the various forms of violence economic social and sexual how to practice nonviolence in all daily interactions

and resolve conflicts through generosity deep listening and loving speech using the Five Mindfulness Trainings traditionally called precepts as practical guidelines of ethical conduct Good Citizens reaches across all political backgrounds and faith traditions It shows that dualistic thinking Republican Democrat Christian Muslim creates tension and a false sense of separateness When we realize that we share a common ethic and moral code we can create a community that can change the world

**Holistic Happiness** Robert P. Vande Kappelle, 2022-06-23 As the founders of the US republic make clear in the Declaration of Independence human beings have an unassailable right to life liberty and the pursuit of happiness While the meaning of these unalienable rights is debated it is clear that these rights are interrelated Concerned with these rights Holistic Happiness focuses on happiness defining the purpose of life as achieving and maintaining happiness conducive to the equitable flourishing of all To this end happiness should not be confused with pleasure which is momentary and transitory for happiness is not so much a feeling as an attitude associated with what we call achieving meaning and purpose in life Properly understood happiness can be achieved but only by inner discipline requiring a transformation of one's outlook attitude and approach to life As this book emphasizes good health is an important foundation for happiness However to experience and maintain good health requires good genes a balanced lifestyle supportive companions wholesome eating and drinking regular exercise a positive mindset an active disposition and good fortune While happiness and good health are frequently disrupted by accidents disease stress chemical and emotional imbalance and numerous other factors wellness is achievable and sustainable but it needs balanced input from an individual's four constituent dimensions physical mental emotional and spiritual In this regard this volume is a resource for individuals seeking holistic happiness While benefitting from recent scholarly research Holistic Happiness is unique in content and conception and is useful for individual or group study Each chapter concludes with questions suitable for discussion or reflection

**Achieving Equal Educational Opportunity for Students of Color** Richard R. Valencia, Valencia presents the most comprehensive theory based analysis to date on how society and schools are structurally organized and maintained to impede the optimal academic achievement of low SES marginalized K 12 Black and Latino/Latina students compared to their privileged White counterparts The book interrogates how society contributes to educational inequality as seen in racialized patterns in income wealth housing and health and how public schools create significant obstacles for students of color as observed in reduced access to opportunities e.g. little access to high status curricula knowledge Valencia offers suggestions for achieving equal education e.g. implementing fairness of school funding improving teacher quality and providing students of color access to multicultural education by disrupting structural racism Considering the rapid aging of the White population and the sharp decline of White youth coupled with the explosive growth in people of color this book argues that the American Imperative must be to assiduously mount an effort to provide an excellent education for students of color who the nation will depend on for a sizable proportion of its work force Book Features Examines how society and schools are failing Black and Latino/Latina students principally

Mexican Americans who are by far the largest Latino Latina group Uses theoretical frameworks that draw from analysis of structural inequality critical race theory anti deficit thinking narratives class by race covariation and an asset based perspective of students of color Discusses the American Imperative and the personal and economic consequences of not investing in students of color

**Nato--the Next Generation** Robert E. Hunter,2019-03-05 The survival of NATO as a viable alliance is currently challenged by a shift in the strategic balance of power as well as by global events and contingencies that extend far beyond NATO s boundaries In the face of these challenges existing institutional mechanisms are proving inadequate to respond effectively The distinguished contributors to this volume draw on their vast political and diplomatic experience to identify and analyze the problems confronting NATO for the remainder of the twentieth century They make clear the need for a trans Atlantic communication network among policymakers scholars and others a network that will allow an ongoing process of analysis and assessment of NATO s strategic economic and political problems along with the identification of appropriate reactions

*An Introduction to Political Thought* Peri Roberts,Peter Sutch,2004-12 *An Introduction to Political Thought* emphasizes a dual approach to political theory by providing a chronological overview of both major figures and texts as well as an understanding of the development of key concepts and themes In this way the authors provide a basic sense of the history and development of political thought and a critical grasp of the theoretical and philosophical issues at the heart of politics Beginning with the idea that laws and constitutions are only beneficial insofar as they give effective expression to our moral and political beliefs the authors argue that moral and political ideas are the foundations of politics Political philosophers covered in depth include Plato Aristotle Hobbes Locke Rousseau Marx Bentham Rawls and Burke Key concepts such as the moral order liberty human nature freedom the social contract distributive justice liberalism socialism feminism human rights and multiculturalism are also all covered In exploring these issues the authors offer a critical guide through key arguments in the history of political thought and contemporary political theory

The Nordic Education Model Ulf Blossing,Gunn Imsen,Lejf Moos,2013-10-21 This book presents a detailed analysis of the educational model in Nordic European countries It describes the traditional idea of education for all which can be characterized by the right for every child to have an education of equal quality in a common school for all pupils regardless of social class abilities gender or ethnicity Against this background The Nordic Education Model traces the rise of neo liberal policies that have been enacted by those who believe the School for All ideology does not produce the knowledge and skills that students need to succeed in an increasingly competitive and global marketplace It examines the conflict between these two ideas and shows how neo liberal technologies affect the Nordic model in different ways The authors also show how social technologies are being interpreted in different ways in actual school practices This process of translating national regulations into internal sense builds on the values in the culture to which they are introduced In the end this book reveals that a Nordic model can constitute a delicate balance between traditional values institutionalized practices and contemporary neo liberal

forms of governance and policies It may be argued from a new institutional perspective that the main structures of the Nordic educational model will sustain as long as the deeply rooted Nordic culture survives in the globalised society
