**Model of Equatorial Scintillations from in Situ Measurements** Sunanda Basu, 1976 In situ measurements of F region irregularity amplitude and ambient electron density made by the retarding potential analyzer RPA on OGO 6 near perigee altitude of 400 km have been utilized to derive the variation of electron density deviation over the equatorial region Based on these measured electron density deviations and other assumed model parameters including a three dimensional power law form of irregularity spectrum of index 4 a model of equatorial scintillations is developed in the framework of diffraction theory The percentage occurrence contours of estimated equatorial scintillations greater than or equal to 4.5 dB at 140 MHz during 1900 to 2300 LMT for the period November to December 1969 and 1970 have been derived The model is found to depict a pronounced longitude variation with the scintillation belt width and percentage occurrence being maximum over the African sector The latitude extent of the spatial scintillation belt narrows over the American sector without much decrease in the scintillation occurrence whereas over the Indian and Far Eastern sectors both the extent and the occurrence are found to decrease The percentage occurrence of scintillations estimated from this model is found to be consistent with VHF scintillation measurements at Ghana Huancayo and Calcutta In addition the model was found to be in qualitative agreement with GHz observations at various longitudes made by the COMSAT group The effect of varying model parameters on scintillation estimates at VHF UHF and GHz are discussed Implications of the observed longitudinal variation of scintillations on current theories of equatorial irregularity formation are indicated Author

Radiation Trapped in the Earth's Magnetic Field Billy McCormac, 2012-12-06 This book contains the lectures presented at the Advanced Study Institute Radiation Trapped in the Earth's Magnetic Field which was held at the Bergen Tekniske Skole Bergen Norway during the period August 16 through September 3 1965 Approximately one third of the time was devoted to discussion The various Session Chairmen have summarized the essential points brought out in these discussion periods which were generally quite spirited The authors and

the publisher have made a special effort to rapidly publish an up to date status concerning the various aspects of trapped radiation Almost all authors turned in their manuscripts prior to the end of the Institute and all prior to September 30 1965 It was clearly recognized that rapid publication was essential in this rapidly changing research area Special thanks are due to the Host Dr Odd Dahl Chr Michelsen Institute for making all of the arrangements in Bergen including excellent living and working facilities Direct financial support was provided the Institute by North Atlantic Treaty Organization Advanced Research Projects Agency Air Force Cambridge Research Laboratories Army Research Office Defence Atomic Support Agency and the Office of Naval Research     *National Bureau of Standards Report* United States. National Bureau of Standards,1960     **Absolute Photometry of the Light of the Night Sky** Franklin Evans Roach,L. L. Smith,1964 A study is presented of one year of systematic zenith observations made with similar photometers at two observing stations Haleakala latitude N 20 7 degrees and Fritz Peak Gilpin County Colo latitude N 39 9 degrees It is shown that for an effective wavelength of 5300 Å there is a change of intensity with sidereal time and therefore right ascension due to three components 1 integrated starlight 2 zodiacal light and 3 airglow continuum Quantitative separation of the components is made A critical comparison is made with some earlier investigations with particular reference to the problem of the galactic light Author

**A Minimum Telemetry Receiving System for the Alouette Topside Sounder Satellite** Earl E. Ferguson,Richard G. *NASA Technical Note* ,1963     *Recent Progress on Gravity Tests* Cosimo Bambi,Alejandro Cárdenas-Avendaño,2024-07-09 Einstein's theory of general relativity is one of the pillars of modern physics and it is our standard framework for describing gravitational fields and the spacetime structure So far general relativity has passed all experimental tests and agrees with observations However the past few years have seen remarkable observational improvements and new techniques that continually challenge the theory's predictions routinely detect the gravitational wave

signals from the coalescence of black holes and neutron stars can image the supermassive black holes at the center of our Galaxy and of the galaxy M87 can analyze the properties of the X ray radiation emitted from the very inner part of the accretion disks of several black holes and keep improving laboratory and Solar System experiments This book offers an updated self consistent overview future perspectives and challenges of experimental and observational tests of gravity with both gravitational and electromagnetic spectra It includes the recent results of laboratory tests of gravity solar system experiments tests of gravity in the strong field regime with astrophysical compact objects and tests of gravity on large scales with cosmological observations

Equatorial Crossings: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Equatorial Crossings : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
