Reforms in Long-Term Care Policies in Europe Costanzo Ranci, Emmanuele Pavolini, 2012-11-08 Over the last two decades many changes have happened to the social welfare policies of various industrial countries Citizens have seen their pensions unemployment benefits and general healthcare policies shrink as belt tightening measures are enforced But in contrast long term care has seen a general growth in public financing an expansion of beneficiaries and more generally an attempt to define larger social responsibilities and related social rights The aim of this book is to describe and interpret the changes introduced in long term care policies in Western Europe The volume argues that recent reforms have brought about an increasing convergence in LTC policies Most of the new programs have developed a new general approach to long term care based on a better integration of social care and health care The book explores increasing public support given to family care work in the past the family would take care of the elderly or infirm and increasing growth and recognition of an extended social care market by which care has shifted from a moral obligation based on family reciprocity to a paid professional activity A new social care arrangement has therefore been developing in Western countries based on a new mix of family obligations market provision and public support In order to understand such changes this analysis will take into account the social and economical impact of these reforms

Equitable Choices for Health Joe Farrington-Douglas, Dr. Jessica Allen, 2005

Choice Bent Greve, 2011-06-09 This book analyzes the impact of choice on welfare states in Europe and asks whether the shift towards more choice will ultimately benefit the users and providers of the welfare state and have a positive impact on society as a whole Explores the recent focus on choice in many welfare states which has created a more market orientated approach changed users to consumers and increased emphasis on private providers Examines the impact of these recent reforms on equality not only from an economic perspective but also in relation to gender education age and access to services Draws on examples from different European countries and sectors of the welfare state including the UK Germany Italy the Netherlands Scandinavia and the Czech Republic Informed by theoretical and empirical approaches and uses a variety of methodologies
