Eric Clapton Easy Recorded Versions:

The Byrds , **The British Catalogue of Music** ,2004 *Some People are Crazy* John Neil Munro,2011-05-01

Described by Empire Magazine as Britain's best ever blues singer John Martyn was one of rock music's last real mavericks. Despite chronic addiction to alcohol and drugs he produced a string of matchless albums. Loved by fans and critics, loathed by ex-wives and managers, he survived the music business he despised for forty years. This book documents his upbringing in Glasgow and rise through the Scottish and London folk scenes of the 1960s, his many career highs and lows and his friendships with the great lost souls of British rock music: Nick Drake and Paul Kossoff. **The Rolling Stones All the**

Songs Expanded Edition Philippe Margotin, Jean-Michel Guesdon, 2022-01-18 Comprehensive visual history of the World's Greatest Rock through their collaboration with legendary producer Jimmy Miller in the ground-breaking albums from 1968 to 1973 to their later work with Don Was who has produced every album since. Voodoo Lounge Packed with more than 500 photos. All the Songs is also filled with stories fans treasure such as how the mobile studio they pioneered was featured in Deep Purple's classic song 'Smoke on the Water' or how Keith Richards used a cassette recording of an acoustic guitar to get the unique riff on 'Street Fighting Man'. **Encyclopedia of the Blues** Gérard Herzhaft, 1997-01-01 The popular Encyclopedia of the Blues first published by the University of Arkansas Press in 1992 and reprinted six times has become an indispensable reference source for all involved with or intrigued by the music. The work alphabetizes hundreds of biographical entries presenting detailed examinations of the performers and of the instruments, trends, recordings and producers who have created and popularized this truly American art form. [A Philosophy of Cover Songs](#) P.D. Magnus, 2022-04-28 Cover songs are a familiar feature of contemporary popular music. Musicians describe their own performances as covers and audiences use the category to organize their listening and appreciation. However, until now, philosophers have not had much to say about them. In *A Philosophy of Cover Songs* P.D. Magnus demonstrates that philosophy provides a valuable toolbox for thinking about covers. In turn, the philosophy of cover songs illustrates some general points about philosophical method. Lucidly written, the book is divided into three parts: how to think about covers, appreciating covers, and the metaphysics of covers and songs. Along the way, it explores a range of issues raised by covers, from the question of what precisely constitutes a cover to the history and taxonomy of the category, the various relationships that hold between songs, performances and tracks, and the appreciation and evaluation of covers. This unique and engaging book will be of interest to those working in philosophy of art, philosophy of music, popular music studies, music history and musicology, as well as to readers with a general interest in popular music covers and how we think about them. *Bobby Whitlock* Bobby Whitlock, Marc Roberty, 2014-01-10 From early childhood singing in church to the rock n' roll limelight of Derek and the Dominos, Bobby Whitlock launched a musical journey still going to this day. Whitlock's life story does more than share rock gossip about stars like Keith Moon, George Harrison and Eric Clapton; however, Whitlock candidly discusses his abusive childhood, his experiences with Delaney and

Bonnie failed marriages and drug addiction and how the star studded lifestyle evolved into a peaceful partnership with his wife and musical partner

Innovators Donald R. Kirsch, 2023-11-07 Scientific breakthroughs that changed the way we understand the world and the fascinating stories of the scientists behind them. Some of the most significant breakthroughs in science don't receive widespread recognition until decades later sometimes after their author's death. Nobel Prize winner Max Planck whose black body radiation law established the discipline of quantum mechanics stated this as what has become known as Planck's principle commonly summarized as Science progresses one funeral at a time. In other words for some truly groundbreaking discoveries a new consensus builds only when proponents of the old consensus die off. Breakthrough discoveries require a paradigm shift and it takes time and new minds for the new paradigm to be adopted. In **Innovators** Donald Kirsch tells the stories of sixteen visionary scientists who suffered this fate some now famous like Max Planck himself Galileo and Gregor Mendel and some less well-known. Among them are Barbara McClintock who working with Indian corn discovered transposons also known as jumping genes which provide a major mechanism driving biological evolution Rachel Carson catalyst for the environmental movement and Roger Revelle the climatologist whose findings were the first to be described by the term global warming. The breakthroughs cover fields from biology to medicine to physics and earth sciences and include the discovery of prions life-changing treatments such as drugs for high blood pressure ulcers and organ transplantation the process of continental drift and our understanding of how molecules form matter.
