Erikson Identity And Religion:

Erikson, Identity and Religion J. Eugene Wright, 1982 **Religion and the Individual** Abby Day, 2016-04-08 What does religion mean to the individual How are people religious and what do their beliefs practices and identities mean to them The individual s place within studies of religion has tended to be overlooked recently in favour of macro analyses Religion and the Individual draws together authors from around the world to explore belief practice and identity Using original case studies and other work firmly placed in the empirical contributors discuss what religious belief means to the individual They examine how people embody what religion means to them through practice considering the different meanings that people attach to religion and the social expressions of their personal understandings and the ways in which religion shapes how people see themselves in relation to others This work is cross cultural with contributions from Asia Europe and North America *Negotiating Identity and Religion* Toolika Wadhwa, 2019-09-16 This book examines the religious lives of young adults growing up in inter religious families in India It explores complex questions of identity social background and religion in twenty first century India The volume studies the religious commitments of young adults analyses the identity formation process for a critical age group and discusses the interpersonal dynamics within inter religious families Drawing on real life stories of mixed heritage Hindu Sikh Muslim Christian Jain Buddhist and Parsi this volume will be of great interest to scholars and researchers of psychology education sociology and social anthropology religious studies politics and other interdisciplinary studies *Psychology, Religion, and Spirituality* James M. Nelson, 2009-02-27 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental und standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical ba ground Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult *The Dimensions that Establish and Sustain Religious Identity* Daniel H. Y. Low, 2018-05-02 Buddhism and Taoism remain vibrant and prominent in Singapore s religious landscape Yet little is known of why Chinese Singaporeans chose and remain in these ancient religions Analyzing over thirty face to face interviews with

Buddhists and Taoists in Singapore this book provides a glimpse into their fascinating narratives consisting of encounters and experiences with the presence and power of spiritual realities A renewed understanding of Buddhism and Taoism will hopefully encourage readers of other religious traditions to create space for each other s religious identity Only then can we continue to live and share a multi religious environment within the small nation state A Psychology of Ultimate Concern Hetty Zock,2023-12-28 **Encyclopedia of Religious and Spiritual Development** Elizabeth M. Dowling,W. George Scarlett,2006 Focuses on the developmental process of religion and spirituality across the human life span This encyclopedia joins a recent trend in research and scholarship aimed at better understanding the similarities and differences between world religions and spiritualities between expressions of the divine and between experiences of the transcendent

Psychological Perspectives on Identity, Religion and Well-Being Preeti Kapur,Girishwar Misra,Nitin K. Verma,2022-07-12 This book takes a social psychological perspective to study the ways in which identity religious beliefs and well being are related to and affect each other in the contemporary world It simultaneously draws upon intellectual resources from the extant interdisciplinary literature to build connections within the broader societal context In view of the social diversity and changes in post globalization India issues of identity religion and well being emerge as dynamic and vibrant aspects of social reality in both individual and group contexts across age groups and genders The current social cultural political scenario in the India therefore points to the need to investigate the outcome of personal and social well being in relation to identity and religion As contexts change these issues take different shades and influence human conditions differentially This book undertakes the investigation by going beyond the traditional tropes of behavioral science and discussing the dynamic interplay and confluence of socio cultural political variables in changing times It draws from a large sample from the four major religious faiths in India Hinduism Islam Christianity and Sikhism and enables readers to understand significant interactions among facets of identity personal and social religious beliefs and practices and well being personal and social with age and gender in an important segment of the global population **A Psychology of Ultimate Concern** Hetty Zock,1990 The SAGE Handbook of the Sociology of Religion James A Beckford,Jay Demerath,2007-10-29 In their introduction to this Handbook the editors affirm Many sociologists have come to realise that it makes no sense now to omit religion from the repertoire of social scientific explanations of social life I wholeheartedly agree I also suggest that this wide ranging set of essays should become a starting point for such enquiries Each chapter is clear comprehensive and well structured making the Handbook a real asset for all those engaged in the field Grace Davie University of Exeter Serious social scientists who care about making sense of the world can no longer ignore the fact that religious beliefs and practices are an important part of this world This Handbook is a valuable resource for specialists and amateurs alike The editors have done an exceptionally fine job of incorporating topics that illuminate the range and diversity of religion and its continuing significance throughout the world Robert Wuthnow Princeton University At a time when religions are increasingly affecting

and affected by life beyond the narrowly sacred sphere religion everywhere seems to be caught up in change and conflict In the midst of this contention and confusion the sociology of religion provides a rich source of understanding and explanation This Handbook presents an unprecedentedly comprehensive assessment of the field both where it has been and where it is headed Like its many distinguished contributors its topics and their coverage are truly global in their reach The Handbook s 35 chapters are organized into eight sections basic theories and debates methods of studying religion social forms and experiences of religion issues of power and control in religious organizations religion and politics individual religious behaviour in social context religion self identity and the life course and case studies of China Eastern Europe Israel Japan and Mexico Each chapter establishes benchmarks for the state of sociological thinking about religion in the 21st century and provides a rich bibliography for pursuing its subject further Overall the Handbook stretches the field conceptually methodologically comparatively and historically An indispensable source of guidance and insight for both students and scholars Choice Outstanding Academic Title 2009 *Religion in Personality Theory* Frederick Walborn, 2013-12-03 Religion in Personality Theory makes clear the link between theory and research and personality and religion Presently most personality texts have a limited discussion of religion and reference few theorists other than Freud and Maslow in relation to the subject This book reviews the theory and the empirical literature on the writings of 14 theorists Every chapter concludes with a summation of the current research on the theorist s proposals Reviews Frederick Walborn has written an excellent text that explores the degree to which classical personality theorists were personally influenced by and focused upon religion in developing their personality theories Each theorist is presented in sufficient detail so that their personal views of religion are seen to influence the theories they developed In addition the current status of the empirical evidence in the psychology of religion is explored in the context of the theorist and theory to which the data is most relevant Current and up to date this text is appropriate for either a course in Personality or as an introduction to the Psychology of Religion The author s own comprehensive theory of religion and spirituality creatively integrates the positive contributions of the classical personality theorist to the contemporary psychology of religion Ralph W Hood Jr Professor of Psychology University of Tennessee at Chattanooga In this interesting and accessible book Frederick Walborn thoughtfully probes the place of religion and spirituality in the writings of a broad range of classical psychological thinkers and offers an insightful critique of current empirical research on the complex relation of religion and spirituality to individual well being Michele Dillon Ph D Professor and Chair Department of Sociology University of New Hampshire Durham New Hampshire Identifies what major personality theorists say about religion Investigates whether evidence supports or refutes predictions made by different theories Concludes with a comprehensive integrative theory on religion and spirituality [Encyclopedia of Identity](#) Ronald L. Freud and Freudians on Religion Donald Capps, 2001-01-01 This book presents selections from Freud's writings on religion and from the work of five more recent contributors to the psychoanalytic study of religion David Bakan Erik H Erikson Heinz Kohut Julia Kristeva and D W Winnicott It is the first collection of texts in the psychology of religion that is oriented more toward religious studies than toward the study of psychology In his introduction Donald Capps points out that psychoanalysis resembles religions in the way in which its founding documents Freud's own writings have been closely read have evoked interpretive battles and have

been reassessed and reapplied in response to changing social and cultural circumstances He notes that just as Freud's writings on religion focus on the biblical text the majority of the authors included here do likewise showing how the Bible may be read psychoanalytically Both Freud and his successors says Capps also reflect the high value that the Christian culture of the West has placed on painting and sculpture revealing the importance of perception and imagination to the psychoanalytic study of religion Capps highlights the ways in which all the Freudians work intertextually with Freud's writings with the writings of other authors included in the book and with other writings of their own

Faith and Human Transformation James Forsyth, 1997 This book proposes the parallel concept that authentic faith development both presupposes and facilitates authentic human development Thomas Aquinas posited a reciprocal relationship between nature and grace grace both presupposes or builds on nature and perfects nature Translated into developmental terms this would mean that religious and spiritual growth takes place on the foundation of healthy human growth and reciprically the authentic religious development facilitates development towards the goals of authentic human growth This study attempts to investigate the validity of this reciprocal relationship as it applies to human and religious growth A dialogue is constructed between the views of four Christian thinkers Kierkegaard Barth Bultmann and Tillich on the dynamics of the Christian faith experience and four psychological theorists Alster Fromm Allport and Frankl on the dynamics of human growth
