Structural Analysis of Historical Constructions - 2 Volume Set Claudio Modena, P.B. Lourenço, P. Roca, 2018-10-30
Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona Spain 1995 and 1998 and Guimarães Portugal 2001, state-of-the-art information is presented in these two volumes on the preservation, protection and restoration of historical constructions, both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect, the papers originating from over 30 countries are subdivided in the following areas: Historical aspects and general methodology; Materials and laboratory testing; Non-destructive testing and inspection techniques; Dynamic behavior and structural monitoring; Analytical and numerical approaches; Consolidation and strengthening techniques; Historical timber and metal structures; Seismic analysis and vulnerability assessment; Seismic strengthening and innovative systems; Case studies. Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure-related issues of historical constructions. *India and Nepal* Makhan Jha, 1998. Based on empirical fieldwork carried out in different parts of both India and Nepal, this volume throws light on the thread of anthropological researches in both neighbouring countries. The chapters in this book range from tribal situation in India to the Muslim tribes of Lakshadweep island, including complex societies, industrialization and urbanization and the various aspects of the Sacred Complex studies in India. Besides the various aspects of religions of Kathmandu and Janakpur. *Sustainability in South Asian Cities* Subhash Anand, Rituparna Bhattacharyya, Madhushree Das, Tulshi Kumar Das, Pushkar K. Pradhan, 2025-03-03. This book explores some of the common socio-economic and environmental challenges faced by the cities of South Asia, which remain highly under-researched. South Asia comprises eight nations: India, Bangladesh, Nepal, Sri Lanka, Bhutan, Maldives, Pakistan, and Afghanistan, consisting of a total population of 1.92 billion in 2022. The majority of the cities in these countries are characterized by haphazard urbanization and multi-dimensional poverty alongside its associated ingredients: floods, water scarcity, food crises, poor sanitation, slums and squatter settlements, and pollution among others. This comprehensive book is contributed by interdisciplinary scholars and includes 25 case studies. The volume brings these socio-economic and environmental challenges to the fore for a better and more nuanced understanding. The book helps policymakers to mitigate the challenges and build sustainable cities. South Asia is perhaps one of the most populous areas on the planet with nearly one-third of its population with over ten cities larger than 10 million and maybe home to four of the largest cities of the world's largest ten. The rights to the city and the right to breathe, bread and work are as significant to South Asians. The current volume is a timely addition to perhaps aiming for sustainable cities with many case studies on initiatives towards that end. The canvas is

vast and the coverage is daunting However the editors have a challenging task to balance out keeping the integrity of the theme in focus Professor Avaya Mohapatra Former Head and Professor now retired North Eastern Hill University Meghalaya It would be fair to say that while the fascinating scientific works inquired into by the authors through several chapters the very book is useful as a reference for readers and researchers regarding urban sustainability in South Asian developing countries including Nepal Keep up the good work Professor Vidhya Bir Singh Kansakar a veteran geographer of Nepal This book should become a companion reader for scholars and students studying sustainability It looks comprehensive admirably clear in its objectives and intellectually lively Professor Suman Singh Department of Geography Banaras Hindu University

Renewing Design with Communities Anisha Shekhar Mukherji, Snehanishu Mukherjee, 2023-04-18 This book looks at alternative ways of analyzing traditional and contemporary architectural design and building practices in South Asia with a special focus on India It showcases how collaborative projects between architects and local communities and drawing from local building traditions can lead to sustainable and equitable practices in architecture The volume includes an analysis of projects in rural tribal and urban areas of India and Nepal and first hand accounts of architects teachers and professionals engaged in the theory and practice of design and architecture It examines the differences between the individualistic and the collective approach and explores the meaning of architecture as a process and as a product and as a decentralized ecologically and locally sensitive way of designing While comparing traditional and modern methods of building it also examines the impact of each method on the community the economy and the surrounding environment This book will be of interest to researchers and students of architecture urban studies urban planning urban ecology urban geography and sustainable development It will also be useful for architects planners urban designers and professionals associated with these disciplines

Groundwater Raya Marina Stephan, James E. Nickum, Philippus Wester, 2023-02-21 Groundwater is invisible but its impact is visible everywhere Everything around us relies on groundwater our drinking water and sanitation our food supply and our natural environment Yet because it is invisible information management and governance of groundwater is often poor and inadequate This book contributes to UN Water Groundwater year 2022 and to the effort of making the invisible visible Through worldwide case studies ranging from the Americas California Brazil to Asia India Iran Lao PDR Nepal Africa Malawi Tanzania South Africa and the MENA region Lebanon Morocco Yemen including cases of transboundary aquifers the chapters in this edited volume reflect important recent advances in interdisciplinary knowledge on the governance management practice and science policy interfaces of groundwater An insightful resource for researchers and planners in the field of environmental policies water laws climate change and groundwater governance this book comes with a new Introduction The other chapters were originally published in Water International

Megacity Yangon Frauke Kraas,Hartmut Gaese,Mi Mi Kyi,2006 Megacities are new urban phenomena results of globalisation and subject to as well as motors of global ecological socio economic and political change New are the dimensions of growth concentrations of population infrastructure economic power and decisions and the simultaneous self energising acceleration processes of development But one must be wary of generalised statements since differences of economic performance social coherence infrastructure conditions and governance structures should not be ignored This publication aims at analysing current transformation processes of Yangon Myanmar as spearhead of national development bridge to Southeast Asia and the world *Urban & Environmental Planning in Nepal* Ambika P. Adhikari,1998 *Nepal Tourism eBook* GURMEET SINGH DANG, **Urban Drought** Bhaswati Ray,Rajib Shaw,2018-12-30 This book presents

water insecurity issues in urban areas while developing a water security index and explores the innovative approaches to water development and management with examples from Asian cities The urban water crisis is a global phenomenon but it is more obvious in the megacities of the developing world Urban drought although not a familiar term will pose a significant threat to humankind in the near future especially in the context of increasing population in cities Many cities are already unable to provide safe clean water for their citizens Some of the world's largest cities depend heavily on groundwater for their water supply It is unlikely that dependence on aquifers which take many years to recharge will be sustainable As urban populations grow water use will need to shift from agriculture to municipal and industrial uses making decisions about allocating between different sectors difficult Inefficient water use practices by households and industries fragmented management of water between sectors and institutions climate induced water shortages environmental degradation of water sources and inadequate use of alternate sources are also issues of major concern Despite recent advances in the literature there exists a considerable gap in attempting an integrated water resource management approach Covering all aspects of urban drought and water insecurity this book is a valuable resource for students researchers academics policy makers and development practitioners
