subject specific books in the series providing a valuable link between disciplines The series complements our other OU series Teaching in the Secondary School which addresses theoretical issues relating to teaching Together these two series provide a complete resource for students      **Vocationalisation of Secondary Education Revisited** Jon Lauglo, R.

Maclean, 2005-05-12 The book is a cutting edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work The book provides concrete examples of the vocationalisation of secondary education with particular reference to the situation in Africa The book appears in the Springer book series on Technical and Vocational Education and Training Issues Concerns and Prospects and complements the International Handbook of Technical and Vocational Education and Training and other publications in the International Library of TVET all of which are publications of the UNESCO UNEVOC

International Centre for TVET in Bonn Germany      *Using Design Research and History to Tackle a Fundamental Problem with School Algebra* Sinan Kanbir, M. A. (Ken) Clements, Nerida F. Ellerton, 2017-10-28 In this well illustrated book the authors Sinan Kanbir, Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school algebra represents a unidimensional trait Kanbir, Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce's triadic signifier interpretant signified theory which is in the realm of semiotics with Johann Friedrich Herbart's theory of apperception and Ken Clements and Gina Del Campo's theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes Practicing classroom teachers formed part of the research team This book appears in Springer's series on the History of Mathematics Education Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education The results of the well designed classroom intervention are sufficiently impressive that the study

might have created and illuminated a pathway for future researchers to take      **Strategies for Sustainable Financing of**

**Secondary Education in Sub-Saharan Africa** Keith M. Lewin, 2008-02-27 Investment in secondary schooling in Sub-Saharan Africa has been neglected since the World Conference on Education for All at Jomtien The World Education Forum at Dakar began to recognize the growing importance of post primary schooling for development Only 25 percent of school age children attend secondary school in the region and fewer complete successfully having consequences for gender equity poverty reduction and economic growth As universal primary schooling becomes a reality demand for secondary schools is increasing rapidly Gaps between the educational levels of the labor force in Sub-Saharan Africa and other regions remain large Girls are more often excluded from secondary schools than boys Secondary schooling costs are high to both governments and households This study explores how access to secondary education can be increased Radical reforms are needed in low enrollment countries to make secondary schooling more affordable and to provide more access to the majority currently excluded The report identifies the rationale for increasing access reviews the status of secondary education in Sub-Saharan Africa charts the growth needed in different countries to reach different levels of participation identifies the financial constraints on growth and discusses the reforms needed to make access affordable It concludes with a road map of ways to increase the probability that more of Africa's children will experience secondary schooling      *Becoming A Teacher: Issues In Secondary Education* Dillon, Justin, Maguire, Meg, 2011-07-01 Becoming a Teacher 4e remains a unique and powerful combination of ideas analysis questions answers and wisdom drawing on the professional experience of the editors and contributors      **Key Issues in English for Specific Purposes in Higher Education** Yasemin Kirkgöz, Kenan Dikilitaş, 2018-01-08 This volume offers research based studies on English for Specific Purposes in higher education from across the world By drawing on international studies the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs teachers and learners in a coherent fashion There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world Knowledge of ESP is an important factor in subject matter learning by students and also closely related to the performance of university graduates in the relevant sectors Careful planning and efficient implementation are essential to ensure the quality of the language learning process For a variety of reasons it proves difficult to maintain ESP instruction in higher education These reasons include the incompetence of teachers lack of materials for that specific context as well as lack of opportunities for ESP teachers to develop their skills The chapters in this book taken from a wide variety of countries shed light on the diversity of current practices and issues surrounding ESP      Key Issues in Bilingualism and Bilingual Education Colin Baker, 1988 The book looks at world wide evidence on issues surrounding bilingualism and bilingual education These issues include the relationship between bilingualism and intelligence the advantages and disadvantages of bilingual education and the role of attitude and motivation in bilingualism      **Meeting the Challenges of Secondary Education in Latin**

**America and East Asia** Emanuela Di Gropello,2006-01-01 In a context of increased primary school enrollment rates secondary education is appearing as the next big challenge for Latin American and East Asian countries This report seeks to undertake a detailed diagnostic of secondary education in these two regions understand some of the main constraints to the expansion and improvement of secondary education and suggest policy options to address these constraints with focus on policies that improve the mobilization and use of resources

**Resources in Education** ,2001-04 Universal Secondary Education in India Jandhyala B. G. Tilak,2020-07-24 This book offers a cutting edge contribution on the importance of secondary education and assesses the strengths and weaknesses of its growth in India Secondary education long neglected faces countless challenges and will require tremendous financial resources millions of additional trained teachers and vast infrastructure in terms of buildings laboratories libraries ICT facilities etc The book examines these critical issues with particular reference to the situation in India It analyses the status quo of secondary education and discusses the strategies and approaches needed in order to universalize it Including 20 chapters authored by eminent scholars in the field and from across the country this book gathers the outcomes of a seminar organized by the Council for Social Development on Universalization of Secondary Education The target audience includes policymakers practitioners administrators education planners researchers teachers and teacher educators with an interest in the future of secondary education
