Eggshells to Objects Susan Arnold, 1979 Instructions for a variety of craft projects that can be made with eggshells

Eggshell Mosaics Gail Dziuba, 2005 Gail Dziuba presents basic advice on this new and exciting craft explaining how to prepare eggs paint the shells apply the pieces and achieve a finished look *Yotvata* Lily Singer-Avitz, Etan Ayalon, 2023-01-03 This book presents the final report of the excavations at Yotvata the largest oasis in the Arabah Valley conducted by the Sonia and Marco Nadler Institute of Archaeology of Tel Aviv University in 1974-1980 under the direction of Dr. Ze'ev Meshel. The report covers two central sites: a fortified Iron I site and an Early Islamic settlement. The Iron I remains consist of an irregular casemate wall surrounding a courtyard. The location of this site suggests that the settlement was established in order to protect the water sources and to overlook and supervise the nearby crossroads. Based on the relative proximity of the site to Timna, it may be concluded that the oasis formed the main source of water and wood for the population involved in copper production in that region. The rich finds uncovered at the Early Islamic settlement including a large courtyard building and a nearby bathhouse among other structures point to habitation from the end of the seventh to the early ninth century CE. The proximity of the settlement to a sophisticated irrigation system (qanat) and the administrative economic ostraca discovered at the site suggest that it served as the center of an agricultural estate owned by an elite Muslim family. Among the unique finds is a large assemblage of locally produced handmade pottery which is thoroughly studied here. The findings from the excavations at the Yotvata oasis have made a major contribution to the study of Early Islamic settlement and material culture in the greater Arabah region and beyond. *Cognitive Models in Palaeolithic Archaeology* Thomas Grant Wynn, Frederick Lawrence Coolidge, 2017 Cognitive Models in Palaeolithic Archaeology grew out of a specialized thematic session that we organized for the 2013 meeting of the European Society for the Study of Human Evolution. Preface **Handbook to Life in Prehistoric Europe** Jane McIntosh, 2009-06-01 For most of Europe's long past we have no writing, no named individuals, no recorded deeds. This means that its history is almost entirely that of the ordinary individual: the hunter-gatherer, farmer, or metallurgist rather than the king. Evidence of privileged elites and material splendor is not lacking; however, the skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry, elaborately woven cloth, beautifully made tools, and finely wrought weapons. Though the palaces that have attracted excavators in other lands are absent, there are few monuments elsewhere in the world to rival Europe's massive megalithic tombs or great stone circles. And though individuals preserve their anonymity and many of their secrets, modern technology has made it possible to reveal parts of their life history in astonishing detail. *Handbook to Life in Prehistoric Europe* gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume. Organized thematically, the handbook covers all aspects of life in prehistoric Europe, including the geography of the continent, settlement, trade, and transport, industry and crafts, religion, death and burial, warfare, language, the arts, and more.

Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire *Living things in action* Nuffield Foundation. Science Teaching Project,1967

Evolution and the Mechanisms of Decision Making Peter Hammerstein,Jeffrey R. Stevens,2024-03-19 A multidisciplinary examination of cognitive mechanisms shaped over evolutionary time through natural selection that govern decision making How do we make decisions Conventional decision theory tells us only which behavioral choices we ought to make if we follow certain axioms In real life however our choices are governed by cognitive mechanisms shaped over evolutionary time through the process of natural selection Evolution has created strong biases in how and when we process information and it is these evolved cognitive building blocks from signal detection and memory to individual and social learning that provide the foundation for our choices An evolutionary perspective thus sheds necessary light on the nature of how we and other animals make decisions This volume with contributors from a broad range of disciplines including evolutionary biology psychology economics anthropology neuroscience and computer science offers a multidisciplinary examination of what evolution can tell us about our and other animals mechanisms of decision making Human children for example differ from chimpanzees in their tendency to over imitate others and copy obviously useless actions this divergence from our primate relatives sets up imitation as one of the important mechanisms underlying human decision making The volume also considers why and when decision mechanisms are robust why they vary across individuals and situations and how social life affects our decisions
