## **Equality And Public Policy:**

*Equality and Public Policy* Paul Chaney, 2011-01-31 Equality of opportunity is a contested concept It evokes strong emotions from proponents and opponents alike Enduring issues of inequality and discrimination mean that it remains at the forefront of political priorities in the twenty first century Traditional analyses tend to focus on developments at the level of the unitary state or European Union In contrast this book underlines the salience of multi level governance and offers the first detailed comparative analysis of contemporary efforts to promote equality of opportunity in the wake of constitutional reform in the UK It presents a summary of social theory on equalities in relation to gender and a full range of social groups and identities such as disability ethnicity sexual orientation and age It outlines the contemporary evidence base relating to patterns and processes of inequality in the devolved nations A governance perspective is also advanced one that details how constitutional law establishing the devolved legislatures contains equality clauses that enable and empower government to promote equality in public policy and law Analysis reveals the development of distinctive regulatory structures and equalities policy lobbies in each territory Overall this volume charts the development of divergent legal rights and public policy on the promotion of equality in the wake of constitutional reform in the UK Notwithstanding ongoing challenges it is argued that the move to quasi federalism is significant for it marks a shift from the predominant centralised administration of social policy witnessed throughout the twentieth century to divergent approaches designed to address contrasting socio economic patterns and processes in Wales Scotland and Northern Ireland

## **Gender Equality and Public Policy**

Paola Profeta, 2020-04-16 Despite formal UN and European Commission commitments to improve gender imbalances progress towards gender equality in wealth and pay has progressed at a discouragingly slow pace in recent decades European countries have been more proactive in their support for corrective policies such as family leave and gender quotas for corporate boards yet measuring the effectiveness of these policies has proven difficult This book offers a close comparative analysis of gender targeted policies in Europe providing an in depth overview of how public policy is shaping gender equality and how the presence of women in the economy and decision making positions is itself shaping public policy Paola Profeta bases her analysis on new data and an innovative interdisciplinary perspective for understanding the relationship between gender equality and public policy and their final impact on the European economy and society with lessons that resonate beyond Europe

### **Women and Employment in Public Policy** Susan Milner, 2024-04-23 In

the UK women's economic empowerment through employment is a success story of the last three decades And yet women are over represented in low paid insecure jobs are under represented in top jobs and earn less than men on average with a marked income gap over the lifecourse When Labour took office in 1997 a new wave of women MPs entered parliament in record numbers and women gained access to ministerial roles including a newly created minister for women However policy on women and employment remained an area of conflict New rights were secured particularly for mothers but when Labour left office a sizeable policy agenda remained unfinished Using documentary evidence and interviews from leading policy actors from the period Women and Employment in Public Policy takes as its starting point the Women and Work Commission which was convened in 2004 to examine causes of the gender pay gap The commission was unable to defuse conflicts over equal pay but it set out an agenda for change at the level of government private sector work organizations and public sector organizations Milner examines why the commission could not resolve key conflicts and why its broad based recommendations were only partially taken up She traces the subsequent development of policy observing well established preferences for light touch regulation which can raise awareness but leave entrenched practices unchallenged and weaken individual women's access to redress Detailed study of the working of the commission provides lessons on the policy process particularly for those seeking to influence policy It also shows that within the wider policy space opportunities for action to effect change are possible based on appeals to instrumental logic or political exchange but are constrained by party leadership

**Public Policy to Reduce Inequalities Across Europe** Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their

requirements and reality We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities
