It's a Wonderful Life Michael Newton,2023-09-07 Frank Capra s It s a Wonderful Life is one of the best loved films of Classical Hollywood cinema a story of despair and redemption in the

aftermath of war that is one of the central movies of the 1940s and a key text in America's understanding of itself. This is a film that remains relevant to our own anxieties and yearnings to all the contradictions of ordinary life while also enacting for us the quintessence of the classic Hollywood aesthetic. Nostalgia, humour and a tough resilience weave themselves through this movie intertwining it with the fraught cultural moment of the end of World War II that saw its birth. It offers a still compelling merging of fantasy and realism that was utterly unique when it was first released and has rarely been matched since. Michael Newton's study of the film investigates the source of its extraordinary power and its long lasting impact. He begins by introducing the key figures in the movie's production notably director Frank Capra and star James Stewart and traces the making of the film and then provides a brief synopsis of the film considering its aesthetic processes and procedures touching on all those things that make it such an astonishing film. Newton's careful analysis explores all those aspects of the film that are fundamental to our understanding of it particularly the way in which the film brings tragedy and comedy together. Finally Newton tells the story of the film's reception and afterlife accounting for its initial relative failure and its subsequent immense popularity.

[The Evolution of Bruno Littlemore](#) Benjamin Hale, 2010-11-01. Bruno Littlemore is quite unlike any chimpanzee in the world. Precocious, self-conscious and preternaturally gifted young Bruno, born and raised in a habitat at the local zoo, falls under the care of a university primatologist named Lydia Littlemore. Learning of Bruno's ability to speak, Lydia takes Bruno into her home to oversee his education and nurture his passion for painting. But for all of his gifts, the chimpanzee has a rough time caging his more primal urges. His untimely outbursts ultimately cost Lydia her job and send the unlikely pair on the road in what proves to be one of the most unforgettable journeys and most affecting love stories in recent literature. Like its protagonist, this novel is big, loud, abrasive, witty, perverse, earnest and amazingly accomplished. *The Evolution of Bruno Littlemore* goes beyond satire by showing us not what it means but what it feels like to be human, to love and lose, to learn, to aspire, to grasp and in the end to fail.

Growing Up in a Land Called Honalee Joel P. Rhodes, 2017-06-01 This study examines how the multiple social cultural and political changes between John Kennedy's inauguration in 1961 and the end of American involvement in Vietnam in 1973 manifested themselves in the lives of preadolescent American children Because the

preadolescent years are according to the child development researchers the most formative Joel P Rhodes focuses on the cohort born between 1956 and 1970 who have never been quantitatively defined as a generation but whose preadolescent world was nonetheless quite distinct from that of the baby boomers Rhodes examines how this group understood the historical forces of the 1960s as children and how they made meaning of these forces based on their developmental age He is concerned not only with the immediate imprint of the 1960s on their young lives but with how their perspective on the era influenced them as adults

The Weight of Reasons Chris Tucker, 2025-03-10 In his comprehensive guide to weighing reasons Chris Tucker explains how to weigh reasons well from daily choices to complex ethical puzzles There are two central claims in the book The first concerns the weights of reasons namely Weight Pluralism the idea that reasons have more than one weight value and these values are not always equal A reason's justifying weight is how well it makes an act permissible A reason's requiring weight is how well it makes a permissible act required For instance the self-interested reasons that make it permissible to go out for dinner one night generally do not also make it impermissible or wrong to stay home instead This fact is to be explained Tucker argues by holding that self-interested reasons have more justifying than requiring weight The second central claim concerns weighing reasons The most natural model for weighing reasons is Single Scale the idea that reasons are weighed on a single two-sided scale Since our reasons to eat out have more justifying weight than requiring weight Single Scale distorts how those reasons work If one were to put the reasons to go out on the left pan and the reasons to stay home on the right pan and the reasons to go out are weightier then Single Scale incorrectly entails that you are required to eat out i.e. eating out is permissible okay and staying home is impermissible wrong This verdict is incorrect because the self-interested reasons that make it permissible to go out to eat tonight generally do not also make it wrong to stay home instead To properly represent such reasons Tucker replaces Single Scale with Dual Scale which is the idea that reasons are weighed on two scales rather than one The book also addresses what the general issue of weighing reasons is whether they have commending weight whether weight values are context sensitive how to tell what the weights of reasons are how reasons for are related to reasons against and how the weights of reasons aggregate
