Flash Of The Cathode Rays:

Flash of the Cathode Rays Per F Dahl, 1997-01-01 The electron is fundamental to almost all aspects of modern life controlling the behavior of atoms and how they bind together to form gases liquids and solids Flash of the Cathode Rays A History of J J Thomson s Electron presents the compelling story of the discovery of the electron and its role as the first subatomic particle in nature The *Flash Rate as a Visual Coding Dimension for Information* Jerome Cohen, Albert J. Dinnerstein, 1958 **Making Truth** Theodore L. Brown, 2003 A new perspective on how scientists reason about the world design and interpret experiments and communicate with one another and with the larger society outside science *Fifty Years of X-Ray Diffraction* P.P. Ewald, 2012-12-06 Origin Scope and Plan of this Book In July 1962 the fiftieth anniversary of Max von Laue s discovery of the Diffraction of X rays by crystals is going to be celebrated in Munich by a large international group of crystallographers physi cists chemists spectroscopists biologists industrialists and many others who are employing the methods based on Laue s discovery for their own research The invitation for this celebration will be issued jointly by the Ludwig Maximilian University of Munich where the discovery was made by the Bavarian Academy of Sciences where it was first made public and by the International Union of Crystallo graphy which is the international organization of the National Committees of Crystallography formed in some 30 countries to repre sent and advance the interests of the 3500 research workers in this field The year 1912 also is the birth year of two branches of the physical sciences which developed promptly from Laue s discovery namely X ray Crystal Structure Analysis which is most closely linked to the names of W H Sir William Bragg and W L Sir Lawrence Bragg and X ray Spectroscopy which is associated with the names of W H Bragg H G J Moseley M de Broglie and Manne Siegbahn Crystal Structure Analysis began in November 1912 with the first papers of W L Bragg then still a student in Cambridge in which by analysis of the Laue diagrams _of zinc blende he determined the correct lattice upon which the structure of this crystal is built **Representing Electrons** Theodore Arabatzis, 2006 Both a history and a metahistory Representing Electrons focuses on the development of various theoretical representations of electrons from the late 1890s to 1925 and the methodological problems associated with writing about unobservable scientific entities Using the electron or rather its representation as a historical actor Theodore Arabatzis illustrates the emergence and gradual consolidation of its representation in physics its career throughout old quantum theory and its appropriation and reinterpretation by chemists As Arabatzis develops this novel biographical approach he portrays scientific representations as partly autonomous agents with lives of their own Furthermore he argues that the considerable variance in the representation of the electron does not undermine its stable identity or existence Raising philosophical issues of contentious debate in the history and philosophy of science namely scientific realism and meaning change Arabatzis addresses the history of the electron across disciplines integrating historical narrative with philosophical analysis in a book that will be a touchstone for historians and philosophers of science and scientists alike **DDC Retrieval and Indexing Terminology** Defense
