Ideologies And Mentalities:

Crime and Mentalities in Early Modern England Malcolm Gaskill, 2003-01-30 Crime and law have now been studied by historians of early modern England for more than a generation *Crime and Mentalities in Early Modern England* attempts to reach further than most conventional treatments of the subject to explore the cultural contexts of law breaking and criminal prosecution and to recover their hidden social meanings In this sense the book is more than just a history from below it is a history from within Conversely the book explores crime to shed light on the long term development of English mentalities in general To this end three serious crimes witchcraft coining and murder are examined in detail revealing new and important insights into how religious reform state formation secularisation and social and cultural change for example the spread of literacy and the availability of print may have transformed the thinking and outlook of most ordinary people between 1550 and 1750

Competing Ideologies in Greek Culture, Ancient and Modern Evy Johanne Håland, 2019-04-04 By using both modern and ancient sources this volume explores the relationship between official religion and popular belief in Greece as illustrated by the relations between competing ideologies or the relationship between ideology and mentality It shows that the communicative aspect of the religious festival is central and allows the reader to get to know other sides of Greece than the picture that today dominates the news resulting from the economic crisis with which the country has struggled for several years

Architecture, Mentalities and Meaning Patrick Malone, 2017-06-14 In order to function architectural theory and practice must be shaped to suit current cultural economic and political forces Thus architecture embodies reductive logic that conditions the treatment of human and social processes which raises the question of how to define objectivity for architectural mentalities that must conform to a set of immediate conditions This book focuses on meaning and on the physical and mental processes that define life in built environments The potential to draw knowledge from aesthetics psychology political economy philosophy geography and sociology is offset by the fact that architectural logic is inevitably reductive cultural socio economic and political However despite the duty to conform it is argued that the treatment of human

processes and the understanding of architectural mentalities can benefit from interdisciplinary linkages small freedoms and cracks in a system of imperatives that can yield the means of greater objectivity This is valuable reading for students and researchers interested in architectural theory as a working reality and in the relationships between architecture and other fields

Popular reading in English c. 1400-1600 Elisabeth Salter,2017-10-03 This book is about reading practice and experience in late medieval and early modern England It focuses on the kinds of literatures that were more readily available to the widest spectrum of the population Four case studies from many possibilities have been selected each examining a particular type of popular literature under the headings religious moral practical and fictional A key concern of the book is how we might use particular types of evidence in order to understand more about reading practice and experience so issues of method and approach are discussed fully in the opening chapter One distinctive element of this book is that it attempts to uncover evidence for the reading practices and experiences of real rather than ideal readers using evidence that is found within the material of a book or manuscript itself or within the structure of a specific genre of literature Salter attempts to negotiate a path through a set of methodological and interpretive issues in order to arrive at a better understanding of how people may have read and what they may have read This in turn leads on to how we may interpret the evidence that manuscripts and early printed books provide for the ways that medieval and early modern people engaged with reading This book will be of interest to academics and research students who study the history of reading popular culture literacy manuscript and print culture as well as to those interested more generally in medieval and early modern society and culture

historians and debates on gender and subaltern studies *Greek Festivals, Modern and Ancient* Evy Johanne Håland, 2017-06-20 This volume represents a multi faceted cross period product of fieldwork conducted in contemporary Greece in combination with ancient sources Based on a comparative analysis of important religious festivals and life cycle rituals the book investigates the importance of cults connected with the Greek female sphere and its relation to the official male dominated ideology Within these festivals are encountered supplementary complementary or competing ideologies connected with men and women and it is shown that there is not a one way power structure or male dominance within Greek culture but rather competing powers linked to the two sexes and their respective spheres In addition to gender the book also explores the relationship between the great and little societies in the form of official and popular religion As such it will serve to broaden the reader s knowledge of ancient but also modern society because it concerns the relationship between various spheres of life which each possess their own competing and overlapping but also co existing value systems Myth and Mentality Anna-Leena Siikala, 2002-05-15 The recent fascination in Finnish folklore studies with popular thought and the values and emotions encoded in oral tradition began with the realisation that the vast collections of the Finnish folklore archives still have much to offer the modern day researcher These archive materials were not only collected by scholars but also by the ordinary rural populace interested in their own traditions by performers and their audiences With its myriad voices this body of source material thus provides new avenues for the researcher seeking to penetrate popular thought What does oral tradition tell us about the way its performers think and feel What sorts of beliefs and ideas are transmitted in traditional songs and narratives Perspectives from the study of mentalities and cultural cognition research provide a framework for investigating these issues This collection of articles works from the premise that the cultural models which shape mentalities give rise to manifest expressions of culture including folklore These models also become embedded in the representations appearing in folklore and are handed down from one generation to the next The topics of the book cover age old myths and world views concepts of witchcraft and the Devil stretching back to the Middle Ages and the values and collective emotions of Finnish and Hungarian agrarian communities **Berlusconi 'The Diplomat'** Emidio Diodato, Federico Niglia, 2018-09-08 This book analyses the foreign policy of Silvio Berlusconi Italian media tycoon and politician who served as Prime Minister of Italy in four governments The authors examine the Italian position in the international arena and its foreign policy tradition as well as Berlusconi s general political stance Berlusconi s foreign policy strategies and the impact of those strategies in Italy Given that Berlusconi is considered a populist leader the volume considers his foreign policy as an instance of populist foreign policy an understudied but increasingly relevant topic The History of Everyday Life Alf Ludtke, 2018-11-20 Alltagsgeschichte or the history of everyday life emerged during the 1980s as the most interesting new field among West German historians and more recently their East German colleagues Partly in reaction to the modernization theory pervading West German social history in the 1970s practitioners of alltagsgeschichte

stressed the complexities of popular experience paying particular attention for instance to the relationship of the German working class to Nazism Now the first English translation of a key volume of essays *Alltagsgeschichte Zur Rekonstruktion historischer Erfahrungen und Lebensweisen* presents this approach and shows how it cuts across the boundaries of established disciplines The result is a work of great methodological theoretical and historiographical significance as well as a substantive contribution to German studies Introduced by Alf L dtke the volume includes two empirical essays one by Lutz Niethammer on life courses of East Germans after 1945 and one by L dtke on modes of accepting fascism among German workers The remaining five essays are theoretical Hans Medick writes on ethnological ways of knowledge as a challenge to social history Peter Sch ttler on mentalities ideologies and discourses and *alltagsgeschichte* Dorothee Wierling on gender relations and *alltagsgeschichte* Wolfgang Kaschuba on popular culture and workers culture as symbolic orders and Harald Dehne on the challenge *alltagsgeschichte* posed for Marxist Leninist historiography in East Germany
