Management Haoqing Xu, 2024-04-29 This book is designed to be the introductory work in the Water Energy Environment Governance from Interdisciplinary Perspectives Series and provides an in-depth look at sustainable development and management in the water sector across The water energy environment nexus WEEN represents important interstate connections of water, energy and the environment. Present-day water and energy systems are interdependent. Water is used in all phases of energy production and electricity generation. Energy is required to extract, convey and deliver water of appropriate quality for diverse human uses and then again to treat waste waters prior to their return to the environment. Security in water, energy and the environment is associated with human economic and environmental sustainability. This interweaving is strengthening under aggregating natural resource scarcity and climate change. This book includes selected papers from the 6th International Symposium on Water Resource and Environmental Management WREM 2023 and consists of themes pertaining to water resource and environmental management. It provides readers with comprehensive information and formulation of solutions leading to a set of Water Energy Environment Governance from Interdisciplinary Perspectives through our forum and the publication of your research. As a reference, it is of interest to students, scientists, engineers, government officials and water resource managers. **The Geopolitics of the Global Energy Transition** Manfred

Hafner, Simone Tagliapietra, 2020-06-09 The world is currently undergoing an historic energy transition driven by increasingly stringent decarbonisation policies and rapid advances in low-carbon technologies.
