Ignorance Explosion Understanding Industrial Civilization:

The Ignorance Explosion J. Lukasiewicz,1994 The author reveals the darker side of Western society's adoption of and adaptation to modern technology Despite his portrayal of an increasingly complex artificial and dehumanized technological environment Lukasiewicz writes with humour and humanism and makes an enlightening contribution to the habitually grim literature on this subject

Knowledge Marian Adolf,Nico Stehr,2016-09-22 As we move through our modern world the phenomenon we call knowledge is always involved Whether we talk of know how technology innovation politics or education it is the concept of knowledge that ties them all together But despite its ubiquity as a modern trope we seldom encounter knowledge in itself How is it produced where does it reside and who owns it Is knowledge always beneficial will we know all there is to know at some point in the future and does knowledge really equal power This book pursues an original approach to this concept that seems to define so many aspects of modern societies It explores the topic from a distinctly sociological perspective and traces the many ways that knowledge is woven into the very fabric of modern society

Organizations and Unusual Routines Ronald E. Rice,Stephen D. Cooper,2010-10-07 Everyone working in and with organizations will from time to time experience frustrations and problems when trying to accomplish tasks that are a required part of their role This is an unusual routine a recurrent interaction pattern in which someone encounters a problem when trying to accomplish normal activities by following standard organizational procedures and then becomes enmeshed in wasteful and even harmful subroutines while trying to resolve the initial problem They are unusual because they are not intended or beneficial and because they are generally pervasive but individually infrequent They are routines because they become systematic as well as embedded in ordinary functions Using a wide range of case studies and interdisciplinary research this book provides researchers and practitioners with a new vocabulary for identifying understanding and dealing with this pervasive organizational phenomenon in order to improve worker and customer satisfaction as well as organizational performance

The Dazzle of the Digital Meghna Bal,Vivan Sharan,2022-10-26 The Dazzle of the Digital is written in the context of digital technology's inextricable link with progress and modernity in India with the COVID pandemic in the backdrop Digital technology such as smartphones and the internet exemplify the popular ideal of a modernity where the proliferation of data and information seamlessly translates into knowledge and value The authors attempt to wrestle with this impulsive conflation of the digital with the modern and argue that the former can sometimes retard progress rather than foster it They provide examples from various spheres ranging from public service delivery to private markets to unpack the pitfalls of a blinkered

view on modernity The book presents an objective take on the potential of digital technology written with the hope that it will prompt greater societal reflection on technology as a lever for advancement at a time when the march of everything digital is inexorable *The Polish Humboldtian University in the Face of Paradigmatic Change* Aleksander Kobylarek, 2017-03-07 The Polish university is based on the Humboldt model and can serve as a typical example of liberal education throughout Central and Eastern Europe This book portrays an institution resistant to change and defying all attempts at reform Currently it is attempting to retain its identity with no regard to the rapidly changing world of science culture and communication technologies that surrounds it The absolute power of the professor excessive administration and feudal subordination mean that such universities have lost touch with the local environment and have become a factory for graduates with a random education Power games and resentment have replaced the search for scientific truth which in turn means that such institutions are practically invisible in the rankings because of the lack of significant achievements This situation has led to proposal here of a redefinition of the function of the university based on a thorough analysis of needs of all its various groups of stakeholders **Climate Change Communication** Daniel James Scott, Canada. Environment Canada, University of Waterloo, 2000 Proceedings of a conference that provided a foundation to begin addressing matters related to communicating the climate change issue in order to raise awareness confer understanding and motivate action Presentations are organized under the following themes climate change perceptions among scientists influences on public understanding of climate change organizational roles in communicating about climate change national climate change perceptions among the public assessment of media representations of climate change promotion of community action stakeholder framing of climate change communication and the science policy interface lessons for civic engagement from other participatory processes social marketing strategies community based communication strategies climate change education through science fiction climate change curriculum development values and responsibility scenarios as communication tools engaging youth linking climate change knowledge stakeholder engagement in the agricultural sector motivating change developing an international climate change communication network communication of natural variability the role of libraries and climate change from an Inuit perspective The final section includes summaries of conference workshops public forums and poster papers

Technology and Culture, 1996 *Information Seeking* J. David Johnson, 1996-06-30 Johnson explores both sides of the information seeking dilemma the reasons why people do and do not look for and get the information they need and why the multi billion dollar technologies that have been developed to facilitate information gathering so often fail Research based with a model to explain how information seeking works in organizations Dr Chaos Theory & Higher Education Marc Cutright, 2001 The challenges of leadership policy formation and strategic planning in higher education are difficult under the best of circumstances Our rapid pace of change and shifting societal expectations of higher education sharpen these challenges The authors of this anthology institutional leaders and academics from the United States Canada and Great

Britain consider metaphors of chaos theory that may have not only descriptive utility but prescriptive power in the enhancement of these duties and opportunities

International Books in Print, 1997 *Choice*, 1994 *Managing Knowledge Networks* J. David Johnson, 2009-10 The information context of the modern organization is rapidly evolving in the face of intense global competition Information technologies including databases new telecommunications systems and software for synthesizing information make a vast array of information available to an ever expanding number of organizational members Management's exclusive control over knowledge is steadily declining in part because of the downsizing of organizations and the decline of the number of layers in an organizational hierarchy These trends as well as issues surrounding the Web 2.0 and social networking mean that it is increasingly important that we understand how informal knowledge networks impact the generation capturing storing dissemination and application of knowledge This innovative book provides a thorough analysis of knowledge networks focusing on how relationships contribute to the creation of knowledge its distribution within organizations how it is diffused and transferred and how people find it and share it collaboratively
