*The Ideology of Power and the Power of Ideology* Göran Therborn, 1999-07-17 Few concepts have been so intensively discussed or so widely sponsored as that of ideology Whether read as the expression of social classes or attributed a material independence and efficacy whether devalued as false and non scientific or asserted as the necessary element of social practice ideology has become an ineluctable conceptual reference across a range of works dealing with subjects as varied as science and politics gender and cultural production In this book Göran Therborn makes a decisive contribution to the contemporary debate Beginning with some critical reflections on Louis Althusser's influential writings in the late sixties Therborn develops a theory of the formation of human subjects He then goes on to consider the material matrix of ideologies and the problem of ideological change the ideological constitution of classes and the characteristics of the discursive order that regulates it Turning to questions of state power and political struggle Therborn provides a remarkable account of ideological domination that displaces traditional categories and a fascinating analysis of the process of political mobilization Brief yet wide ranging probing yet succinct *The Ideology of Power and the Power of Ideology* is a work of theoretical exploration that establishes new bearings for the current discussion of ideology

Power, Politics, Law: International Law and State Behaviour During International Crises Radhika Withana, 2008-07-31 This volume addresses the question as to where international law fits into the making and implementation of foreign policy during an international crisis in which a State is considering and or may actually use force Empirical literature on the law State behaviour relationship during international crises has not been able to answer this question adequately The limitations of existing empirical literature are identified as stemming from the limitations of existing positivist realist and functionalist theoretical explanations of the law State behaviour relationship These theoretical approaches which underpin existing empirical literature on international crises assume that international law matches what is referred to in this book as its rule book image This is the notion of international law as a finite set of objective politically neutral rules that can be applied so as to distinguish objectively between legal and illegal action The rule book image of international law does not match reality but the assumption that it is true underpins both theoretical literature and references to international law in political rhetoric The rule book image and the reality of international law have been reconciled within the theory of International law as Ideology ILI as developed by Shirley Scott This book hypothesises that an ILI perspective offers a better explanation of the law State behaviour relationship during international crises than rival

explanations grounded in positivism realism or functionalism Four case studies of State behaviour of the US the Soviet Union and the PRC during the Korean War 1950 1953 of the US and UK during the Suez crisis 1956 of the US and the Soviet Union during the Cuban Missile Crisis 1962 and of the US and an alliance of Latin American States during the Dominican Republic crisis 1965 are used to test the hypothesis The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision making during international crises is more than that of deterring the use of force as is assumed by rival theoretical approaches grounded in a rule book image of international law International law is shown to serve as a vehicle for inter State competition during international crises
