Input Interaction And The Second Language Learner:

Input, Interaction, and the Second Language Learner Susan M. Gass, 2013-04-03 This volume provides a definitive view of the relationship between input interaction and second language acquisition. In so doing it should prove useful to those whose major concern is with the acquisition of a second or foreign language as well as for those who are primarily interested in these issues from a pedagogical perspective. The book does not explicate or advocate a particular teaching methodology but does attempt to lay out some of the underpinnings of what is involved in interaction: what it is and what purpose it serves. Research in second language acquisition is concerned with the knowledge that second language learners do and do not acquire and how that knowledge comes about. This book ties these issues together from three perspectives: input interaction, framework, information processing, and learnability. *Input, Interaction, and the Second Language Learner* Susan M. Gass, 2017-10-06

Twenty years after its first publication, Susan M. Gass's *Input Interaction and the Second Language Learner* has become a classical text in the field of second language acquisition (SLA). This new printing includes the original text along with a new preface that comprises individual consultations between the author and Alison Mackey, Rod Ellis, and Mike Long on the importance of the project two decades later. The volume provides an important view of the relationship between input interaction and SLA. In so doing it should prove useful to those whose major concern is with the acquisition of a second or foreign language as well as those who are primarily interested in these issues from a pedagogical perspective. The book does not explicate or advocate a particular teaching methodology but does attempt to lay out some of the underpinnings of what is involved in interaction: what interaction is and what purpose it serves. Research in SLA is concerned with the knowledge that second language learners do and do not acquire and how that knowledge comes about. This book ties these issues together from three perspectives: the input interaction framework, information processing, and learnability. This Routledge Linguistics Classic remains a key text for all SLA scholars and an essential supplementary volume for students on SLA courses.

Second Language Acquisition Susan M. Gass, Larry Selinker, 2001 This book is a thorough revision of the highly successful text first published in 1994. The authors retain the multidisciplinary approach that presents research from linguistics, sociology, psychology, and education in a format designed for use in an introductory course for undergraduate or graduate students. The research is updated throughout, and there are new sections and chapters in this second edition as well. New chapters cover child language acquisition, first and second Universal Grammar, and instructed language learning. New sections address issues such as what data analysis doesn't show, replication of research findings, interlanguage transfer, multilingual acquisition, and transfer. The aspect hypothesis, general nativism, connectionist approaches, and implicit/explicit knowledge. Major updates include nonlanguage influences and the lexicon. The workbook *Second Language Learning Data Analysis* Second Edition makes an ideal accompaniment to the text. **Input, Interaction and Corrective Feedback in L2 Learning** Alison Mackey, 2013-01-10 A study of the role of language input interaction and corrective feedback in second

throughout Carroll's work are explored in this volume. The contributions cover a range of topics such as the emergence of linguistic theorizing in language acquisition research, the acquisition of grammatical gender, classroom language learning, learning on first exposure, asymmetries between developmental trajectories in first and second language acquisition, and the effects of grammatical complexity on language development. **The Routledge Handbook of Second Language**

Rokita-Jaśkow, Melanie Ellis, 2019-01-18 This book provides a holistic overview of what leads to success in foreign language learning at an early age and deepens our understanding of early foreign language learning. The studies use an array of methodological approaches to research learners aged between three and ten as well as their parents and teachers in instructional minimal input settings. They describe various ways of organising and promoting very early foreign language learning both through language policy and innovative pedagogy and focus on ways of providing input for second language acquisition which include oral classroom discourse strategies as well as learner development of literacy skills. Special attention is given to the necessity to develop critical reading skills, the ability to handle multimodal texts and attitudes, motivations and behaviours and how these may impact on the teaching and learning process. Chapters emphasise that ultimate outcomes depend on extra linguistic environmental factors such as parental involvement and teacher competences. These include establishing control in the classroom as well as using appropriate strategies for Negotiation of Meaning and helping learners build positive self concept. This book will be of interest to all professionals involved in the teaching of foreign languages to young learners as well as to researchers, teacher educators and students working in this area. *The Oxford Handbook of Applied Linguistics* Robert B. Kaplan, 2010-09-30 A monumental editorial enterprise. It is to be commended and used widely and wisely. *ESL Magazine* **Applied Language Learning**, 2009
