A Practitioner's Guide to Maritime Boundary Delimitation Stephen Fietta, Robin Cleverly, 2016 This book provides a user friendly and practical guide to the modern law of maritime boundary delimitation The law of maritime boundaries has seen substantial evolution in recent decades The book provides a comprehensive overview of the law in this field and its development through the United Nations Convention on the

Law of the Sea which set out the framework of the modern law in 1982 The Convention itself has since been substantially built upon and clarified by a series of judicial and arbitral decisions in boundary disputes between sovereign states which themselves also built upon earlier case law The book dissects each of the leading international judgments and awards since the North Sea Continental Shelf Cases in 1969 providing a full analysis of the issues and context in each case explaining their fundamental importance to shaping the law The book provides forty clear technical illustrations to carefully demonstrate the key issues at stake in this complex area of law Technological developments in the exploitation of maritime natural resources including oil and gas have provided a significant impetus for recent boundary disputes as they have made the resources found in remote areas of the ocean and seabed more accessible However these resources cannot effectively be exploited at the moment as hundreds of maritime boundaries worldwide remain undelimited The book therefore complements the legal considerations raised with substantial technical input It also identifies key issues in maritime delimitation which have yet to be resolved and sets out the possible future direction the law may take in resolving them It will be an unique and valuable resource for lawyers involved in cases involving maritime delimitation and scholars and students of the law of the sea

The Violence of Incarceration Phil Scraton, Jude McCulloch, 2023-04-21 Conceived in the immediate aftermath of the humiliations and killings of prisoners in Afghanistan and Iraq of the suicides and hunger strikes at Guantanamo Bay and of the disappearances of detainees through extraordinary rendition this book explores the connections between these shameful

events and the inhumanity and degradation of domestic prisons within the allied states including the USA Canada Australia the UK and Ireland The central theme is that the revelations of extreme brutality perpetrated by allied soldiers represent the inevitable end product of domestic incarceration predicated on the use of extreme violence including lethal force Exposing as fiction the claim to the political moral high ground made by western liberal democracies is critical because such claims animate and legitimate global actions such as the war on terror and the indefinite detention of tens of thousands of people by the United States which accompanies it The myth of moral virtue works to hide silence minimize and deny the brutal continuing history of violence and incarceration both within western countries and undertaken on behalf of western states beyond their national borders
