Mitroff, R.O. Mason, 2012-12-06 The depth intensity and long standing nature of the disagreements

between differing schools of social thought renders more critical than ever the treatment of dialectical reasoning and its relationship to the social sciences. The nature of these disagreements are deeply rooted in fundamentally differing beliefs regarding among many things 1 the nature of man 2 the role of theory versus data in constructing social theories 3 the place and function of values versus facts in inquiry etc. It has become more and more apparent that such fundamental differences cannot be resolved by surface appeals to rationality or to consensus. Such for it is precisely the definitions of appeals are doomed to failure: rationality and consensus that are at odds. That is, different schools not only have different definitions of rationality and consensus but different notions regarding their place and function within a total system of inquiry. A dialectical treatment of conflicts is called for because such conflicts demand a method which is capable of recognizing first of all how deep they lie. Secondly a method is demanded which is capable of appreciating that the various sides of the conflict fundamentally depend on one another for their very existence; they depend in other words on one another not in spite of their opposition but precisely because of it.

Risk Governance Ortwin Renn, 2017-12-04. Risk Governance is a tour de force. Every risk manager, every risk analyst, every risk researcher must read this book; it is the demarcation point for all further advances in risk policy and risk research. Renn provides authoritative guidance on how to manage risks based on a definitive synthesis of the research literature. The skill with which he builds practical recommendations from solid science is unprecedented. Thomas Dietz, Director, Environmental Science and Policy Program, Michigan State University, USA. A masterpiece of new knowledge and wisdom with illustrative examples of tested applications to real-world cases. The book is recommendable also to interested students in different disciplines as a timely textbook on risk beyond risk. Norio Okada, Full Professor and Director at the Disaster Prevention Research Institute, DPRI, Kyoto University, Japan. There are classic environmental works such as *The Tragedy of the Commons* by Hardin, *Risk Society* by Beck, *The Theory of Communicative Action* by Habermas and the seminal volumes by Ostrom on governing the commons. Renn's book fits right into this series of important milestones of environmental studies. Jochen Jaeger, Professor at Concordia University, Montreal, Canada. Risk Governance provides a valuable survey of the whole field of risk and demonstrates how scientific, economic, political and civil society actors can participate in inclusive risk governance. Jobst Conrad, Senior Scientist, Social Science Research Center, Berlin, Germany. Renn offers a remarkably fair-minded and systematic approach to bringing together the diverse fields that have something to say about risk. Risk Governance moves us along the path from the noisy formative stage of thinking about risk to one with a stronger empirical, theoretical and analytical foundation. Baruch Fischhoff, PhD, Howard Heinz University Professor, Carnegie Mellon University, Pittsburgh, USA. I cannot describe how impressed I am at the breadth and coherence of Renn's career's work. Written with remarkable clarity and minimal technical jargon, this should be required reading in risk courses. John Graham, former director of the Harvard Risk Center and former deputy director of the Office of Budget and Management of the United States Administration. This book for the first time brings together and updates the groundbreaking

work of renowned risk theorist and researcher Ortwin Renn integrating the major disciplinary concepts of risk in the social engineering and natural sciences The book opens with the context of risk handling before flowing through the core topics of assessment evaluation perception management and communication culminating in a look at the transition from risk management to risk governance and a glimpse at a new understanding of risk in post modern societies Conflict And Choice In Resource Management John S. Dryzek,2019-03-04 This book examines the process of policymaking in situations in which the interests values and rights of the various actors conflict with one another and suggest contradictory courses of action Focusing on the problems of resource management in Alaska s coastal and offshore regions Dr Dryzek shows how present mechanisms and analytical technique *Research Methods for Sport Management* James Skinner,Allan Edwards,Ben Corbett,2014-10-30 Research methods courses have become a compulsory component of most degree programs in sport management This is the first introductory research methods textbook to focus exclusively on sport management Through the use of examples cases and data taken from the real world of sport management it opens up a traditionally dry area of study helping the student to understand the vital importance of sound methodology in their studies and subsequent professional practice The book covers the full range of quantitative and qualitative methods across the whole span of the research process from research design and the literature review to data analysis and report writing Every chapter contains a range of useful features to aid student learning including summaries discussion questions and guides to further resources as well as examples drawn from contemporary sport around the world *Research Methods for Sport Management* is an essential course text for all sport management students and an invaluable reference for any sport management professional involved in operational research ECRM 2020 20th European Conference on Research Methodology for Business and Management Studies Dr. Manuel Au-Yong-Oliveira,Professor Carlos Costa,2020-06-18 The European Conference on Research Methodology for Business and Management Studies was established 19 years ago This event has been held in countries across Europe including Ireland England France Malta Portugal Spain to mention only a few of the countries who have hosted it The conference is generally attended by participants from more than 25 countries The Electronic Journal of Business Research Methods indexed by Scopus publishes a special edition of the best papers presented at this conference The conference once again played host to the Innovation in Teaching of Research Methodology Excellence Awards The Biology and Conservation of Animal Populations John A. Vucetich,2024-07-02 This work is the first textbook on population biology grounded in conservation of wildlife giving students an approachable and motivational context for equation heavy fundamentals
