Landforms of England and Wales Andrew Goudie,Piotr Migoń,2020-05-10 This book presents the geomorphological
diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes
reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years
including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed
in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific
landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and
landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and
many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the
geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an
easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing
and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists
in landscape research geoconservation tourism and environmental protection
