Mussio,2001 Mussio is a communications consultant who traces how Canada handled expansion in telecommunications and the arrival of the computer in the three critical decades following World War II Like technological transformations in transportation and utilities the spread of new communications systems forced governments to respond in continental Europe and the UK they asserted control and ownership of national telecommunication networks In the US private companies were permitted to manage systems and provide services In Canada both models were adopted and domestic hybrids combining both also flourished Distributed in the US by Cornell University Services c Book News Inc     Powermatics Marike Finlay - de Monchy,2015-10-23 Originally published in 1987 This critical work is an exploration of new communications technology in its social context as a social discourse determined by other forms of inter play The author refers to Weber Innis Habermas and Foucault to develop her argument     **Assessing the Canada-U.S. Free Trade Agreement** Institute for Research on Public Policy,1987 The implementation of the proposed agreement would remove many of the remaining barriers to commerce between Canada and the US but there remain many details of the proposed Agreement and many potential consequences uncertain This volume contains the proceedings of a conference that sought to provide a neutral forum to assess the implications for Canada Analyses the elements of the Agreement and the regional sectoral and labour market adjustment issues and broader concerns with respect to cultural economic and political sovereignty     **Canada Can Compete!** Joseph R. **Japanese Business in Canada** Richard W. Wright, Institute for Research on Public Policy, 1984 From the back cover Richard Wright s study chronicles and analyses the Japanese business presence in Canada It reveals several distinguishing characteristics of Japanese investment which should help allay some traditional Canadian concerns about foreign investment Japanese investment is small in proportion to the total volume of Canada Japan trade Moreover unlike other traditional foreign investors who generally seek to gain direct control of affiliated companies in Canada Japanese investors aim primarily to secure reliable flows of raw materials Because the Japanese emphasis is on trade rather than on investment flows a high proportion of Japanese investment is in the form of loans rather than equity and the Japanese often take minority holdings or enter into joint ventures The role of Japanese investment is thus a very different one from that which has been a source of concern about foreign ownership in Canada

**Foreign Direct Investment** A. E. Safarian, Institute for Research on Public Policy, 1985 From the back cover Foreign direct investment and multinational enterprises play a major but controversial role in Canada Why do we see multinational enterprises use the subsidiary to transfer their techniques and products rather than national enterprises selling their products to foreigners through markets What impacts do multinational enterprises have on the economic growth balance of payments industrial performance and national independence of the home country Professor Safarian addresses these questions and others as he surveys the research of Canadian economists in this field Although economists have recently produced more and better analysis of foreign direct investment the author maintains that additional research is required The complex macro and micro economic impacts require more precise theoretical and empirical study Sarafin

concludes that economists and other social scientists must close the gaps in understanding foreign direct investment
