Issues In Economics Today:

Issues in Economics Today Robert C. Guell, Robert Guell, 2006 Issues in Economics Today is a modern issues book that presents the latest and most interesting topics. Most importantly, this title was developed to allow instructors the maximum flexibility to teach this material in a manner that fits their personal style. Some professors like to intertwine theory and issues while others like to lay the theoretical foundation first before heading into the issues. Some faculty will choose to set a theme for their course and pick issues consistent with that theme while others will let their students decide what issues interest them. Beginning with eight intensive core theory chapters and followed by 33 shorter issues chapters, there is no right way to use the book. The 33 issues chapters are divided into the following categories: Macroeconomic Issues, International Issues, Externalities and Market Failure, Health Issues, Government Solutions to Societal Problems, Discrimination Issues, Price Control Issues, and Miscellaneous Markets.

Issues in Economics Today Robert Guell, 2017-04-05 Guell's Issues in Economics Today presents economic theory brought to life through current issues with an engaging conversational style. The 8th edition includes 8 theory chapters introducing the core topics in microeconomics and macroeconomics and a selection of 40 short issues chapters from which instructors can pick and choose the issues of most interest to their students. This format allows maximum flexibility for instructors to lay a foundation of theory first or dive right into coverage of today's current issues. In addition, issues can be organized along themes such as social policy, health and education policy, election year issues, international issues, and business issues or combined with outside content. Guell's 8th edition provides content that is timely and relevant for students, flexible enough to fit any course design.

Loose Leaf for Issues in Economics Today Robert Guell, 2020-02-11 Guell's Issues in Economics Today brings economic theory to life by presenting current issues in an engaging conversational style. The 9th edition is a practical and relevant introduction for first-year survey and issues students and upper-level policy students in other social sciences. Issues in Economics Today contains eight core theory chapters covering the essential tools of microeconomics and macroeconomics. With forty short issues chapters, instructors can select the issues of most interest to their students or create a thematic course using the correlation guide to structure the course around social policy, health and education policy, election year issues, international issues, or business issues. This format allows maximum flexibility for instructors to lay a foundation of theory first or dive right into coverage of today's current issues. Instructors looking to engage their students with relevant topics in survey courses will find it easy to present the essential theory in a way that leaves plenty of time for exciting applications. Guell's 9th edition provides content that is timely and relevant for students, yet flexible enough to fit any course design.
