Challenges in Basic Mathematics Education ,2012 **Mathematical Knowledge in Teaching** Tim

Rowland,Kenneth Ruthven,2011-01-06 The quality of primary and secondary school mathematics teaching is generally agreed to depend crucially on the subject related knowledge of the teacher However there is increasing recognition that effective teaching calls for distinctive forms of subject related knowledge and thinking Thus established ways of conceptualizing developing and assessing mathematical knowledge for teaching may be less than adequate These are important issues for policy and practice because of longstanding difficulties in recruiting teachers who are confident and conventionally well qualified in mathematics and because of rising concern that teaching of the subject has not adapted sufficiently The issues to be examined in Mathematical Knowledge in Teaching are of considerable significance in addressing global aspirations to raise standards of teaching and learning in mathematics by developing more effective approaches to characterizing assessing and developing mathematical knowledge for teaching

anxiety and misguided beliefs about mathematics This book is designed to support instructors who teach these students in mathematics content for elementary teachers courses Elementary teachers need a richly developed understanding of the mathematics they are teaching in order to teach it effectively Providing them with the needed preparation is difficult but can be eased with a solid understanding of the mathematical concerns and limitations PSTs bring to the learning of mathematics and a familiarity with the standards and curricula topics PSTs will be expected to teach Chapter One makes the argument that elementary mathematics is not trivial This is followed by an analysis of four central issues related to the mathematical preparation of elementary teachers specifically 1 selecting creating modifying and implementing mathematical tasks 2 noticing understanding children s ways of thinking as a foundation for learning mathematics 3 developing mathematical habits of mind in PSTs and 4 understanding the role affect plays in the mathematical learning of PSTs The final chapter presents three international examples of programs that currently consider these factors in the implementation of their courses

in this examination of mathematics education over the last fifty years during which Professor Bishop has been active in the field. A comprehensive discussion of each of these topics is realized by offering the reader a classic research contribution of Professor Bishop's together with commentary and invited chapters from leading experts in the field of mathematics education. *Critical Issues in Mathematics Education* will make an invaluable contribution to the ongoing reflection of mathematics education researchers worldwide but also to policy makers and teacher educators who wish to understand some of the key issues with which mathematics education has been and still is concerned and the context within which Professor Bishop's key contributions to these research issues were made.

Handbook of Research on Mathematics Teaching and Learning

Douglas A. Grouws, 1992. It is an indispensable working tool for everyone interested in pursuing research in mathematics education as the references for each of the Handbook's twenty-nine chapters are complete resources for both current and past work in that particular area. The Handbook's twenty-nine chapters are organized into five major sections. Overview presents a history of research in mathematics education, an analysis of how mathematics as a discipline has changed over time and how these shifts have influenced research, and a theoretical reconceptualization of one of the most crucial issues in mathematics education: the nature of understanding within the context of learning and teaching. Mathematics Teaching includes articles on the culture of the classroom, effective teaching, teacher beliefs, classroom organization, and teacher education.

Mathematical Problem Posing Florence Mihaela Singer, Nerida F. Ellerton, Jinfa Cai, 2015-06-12. The mathematics education community continues to contribute research-based ideas for developing and improving problem posing as an inquiry-based instructional strategy for enhancing students' learning. A large number of studies have been conducted which have covered many research topics and methodological aspects of teaching and learning mathematics through problem posing. The Authors' groundwork has shown that many of these studies predict positive outcomes from implementing problem posing on student knowledge, problem solving and posing skills, creativity, and disposition toward mathematics. This book examines in depth the contribution of a problem posing approach to teaching mathematics and discusses the impact of adopting this approach on the development of theoretical frameworks, teaching practices, and research on mathematical problem posing over the last 50 years.

What Matters? Research Trends in International Comparative Studies in Mathematics Education Ji-Won Son, Tad Watanabe, Jane-Jane Lo, 2017-03-03. This book provides a unique international comparative perspective on diverse issues and practices in mathematics education between and among the US and five high-performing TIMSS education systems: Japan, China, Singapore, South Korea, and Taiwan. The book offers multiple perspectives on the important factors that contribute to mathematics teaching and learning in different educational systems and cultural contexts. Using large-scale data generated by numerous international comparative studies, the book analyzes and provides context for various methodological perspectives. The book raises compelling questions and issues for mathematics education researchers, leading to a critical examination of what can be learned from other education systems.

Authors address four major research perspectives by critically examining cross national similarities and differences such as research on the influence of curriculum on student learning research on institutional systems of mathematics teacher education research on improving teacher knowledge and pedagogical approaches and research using large scale data This collection of perspectives serves as a foundation for reviewing and analyzing the international comparative studies introduced in the book Values and Valuing in Mathematics Education Philip Clarkson, Wee Tiong Seah, JeongSuk Pang, 2019-04-24 This engaging open access book discusses how a values and valuing perspective can facilitate a more effective mathematics pedagogical experience and allows readers to explore multiple applications of the values perspective across different education systems It also clearly shows that teaching mathematics involves not only reasoning and feelings but also students interactions with their cultural setting and each other The book brings together the work of world leaders and new thinkers in mathematics educational research to improve the learning and teaching of mathematics Addressing themes such as discovering hidden cultural values a multicultural society and methodological issues in the investigation of values in mathematics it stimulates readers to consider these topics in cross cultural ways and offers suggestions for research and classroom practice It is a valuable resource for scholars of mathematics education from early childhood through to higher education and an inspiring read for all mathematics teachers
