Isaac Newton Reluctant Genius:

Isaac Newton, Reluctant Genius D. C. Ipsen, 1985 A biography of the seventeenth century English scientist who developed the theory of gravity discovered the secret of light and color and formulated the system of calculus Isaac Newton Gale E. Christianson, 1996-09-19 In 1665 when an epidemic of the plague forced Cambridge University to close Isaac Newton then a young undistinguished scholar returned to his childhood home in rural England Away from his colleagues and professors Newton embarked on one of the greatest intellectual odysseys in the history of science he began to formulate the law of universal gravitation developed the calculus and made revolutionary discoveries about the nature of light After his return to Cambridge Newton's genius was quickly recognized and his reputation forever established This biography also allows us to see the personal side of Newton whose life away from science was equally fascinating Quarrelsome quirky and not above using his position to silence critics and further his own career he was an authentic genius with all too human faults

Power of the Midheaven Stephanie Jean Clement,2001 The horoscope is a map of the heavens at any particular time usually at the birth of a person An important aspect to consider when creating charts is the Midheaven Before computers it was a vital computation in setting up horoscopes Curiously many astrologers ignore this point in their interpretations During over twenty five years as a professional astrologer Stephanie Jean Clement Ph D has emphasized that no point of a chart is unimportant She reveals what she has learned in The Power of the Midheaven Attention to the Midheaven can revolutionize your understanding of astrology If you are an astrologer you need the information in this book to make your readings more complete and to have a full understanding of a chart The Midheaven indicates what we know about ourselves The primary form of analysis is to examine the sign the Midheaven is in For example people with Leo Midheavens set their goals high and have the staying power to achieve them They want to rise to the top socially Jacqueline Kennedy is an example as is Grace Kelly They are self confident generous know they are fine leaders and have organizational capability but may not be able to admit their own shortcomings A Leo Midheaven is the master of control and free will and achieves spiritual enlightenment by knowing that the physical body is necessary Dr Clement points out that both Charlie Chaplin and Adolf Hitler have a Leo Midheaven they were born within days of each other She gives quotes showing how they used their wills to control people and both worked hard to eventually reach the top Obviously they were quite different people but the way they achieved their goals was similar Chaplin actually experienced his first movie making disappointment with The Little Dictator a film about Hitler This book covers the Midheaven through all the signs It also includes planets in aspect transits and much more If you are an astrologer or if you are at all interested in your horoscope you need this book

as well as the specialist an insight into the life personality and achievements of one of England's greatest scientists and polymaths Evolution Versus Revolution Melvyn L. Fein, 2017-07-05 Revolutionary and evolutionary theorists have very different views about change Fein writes in favour of evolution He proposes an integrated model of social evolution one that accounts for the complexity inconclusiveness and impediments that characterize social transformations This multi dimensional approach recognizes that change is always saturated in conflict Major changes are rarely initiated by conscious decisions that are automatically implemented power and morality generally control the direction that significant alterations take Fein explains how the social generalist dilemma places our need for both flexibility and stability in opposition to each other such that non rational mechanisms are needed to produce a solution He also describes how an inverse force rule dictates that small societies are bound together by strong social forces whereas large ones are secured by weak forces This suggests that social roles are likely to become professionalized over time If social change is in fact analogous to natural rather than artificial selection we may be in the midst of an only partially predictable middle class revolution Indeed the current impasse between liberals and conservatives may be evidence that we are in the consolidation phase of this process Should this be the case a paradigm shift not a classical revolution is in our future Historical Lights: Six Thousand Quotations from Standard Histories and Biographies, with Twenty Thousand Cross-references and General Index, Also an Index for Personal Names Charles Eugene Little, 1886 *Historical Lights* Charles Eugene Little, 1896 *Children's Catalog* H.W.
