**Commercial Management of Projects** David Lowe, Roine Leiringer, 2008-04-15 This is the first book to establish a theoretical framework for commercial management. It argues that managing the contractual and commercial issues of projects from project inception to completion is vital in linking operations at the project level and the multiple projects portfolios programmes level to the corporate core of a company. The book focuses on commercial management within the context of project-oriented organisations for example aerospace construction IT pharmaceutical and telecommunications in the private and public sectors. By bringing together contributions from leading researchers and practitioners in commercial management it presents the state of the art in commercial management covering both current research and best practice. Commercial Management of Projects defining the discipline covers the external milieu competition culture procurement systems the corporate milieu corporate governance strategy marketing trust outsourcing the projects milieu management of uncertainty conflict management and dispute resolution performance measurement value management and the project milieu project governance contract management bidding purchasing logistics and supply cost value reconciliation. Collectively the chapters constitute a step towards the creation of a body of knowledge and a research agenda for commercial management.

**Cleaner Production** Francisco José Gomes da Silva, Ronny Miguel Gouveia, 2019-07-18 This book provides an overview of cleaner production including how regulations have evolved and presents a broad perspective on how it is being developed. Presenting several practical examples and applications of modern clean production technologies it provides readers with ideas on how to extend these practices to other industry sectors in order to contribute to a better environment in the future. The authors start from the initial concepts of how to implement new cleaner production systems before collecting recent developments in the area and demonstrating practical ways in which the latest knowledge can be applied. It motivates readers to develop new ideas on how to improve manufacturing systems to save energy and generate less waste and discusses strategies on how to save reuse and adapt materials as well as techniques to reduce the waste and pollution produced. This book serves as a reference resource for industrial management engineers and researchers and is also of interest to undergraduate and postgraduate students looking for insights into cleaner production in industry.
