orientations cultures and classes Field Research Robert G. Burgess, 2003-09-02 First Published in 1982 Routledge is an **Ethnography** Paul Atkinson, 2007-06-26 Now in its third edition this imprint of Taylor Francis an informa company leading introduction to ethnography has been thoroughly updated and substantially rewritten It offers a systematic introduction to ethnographic principles and practice New material covers the use of visual and virtual research methods hypermedia software and the issue of ethical regulation There is also a new prologue and epilogue The authors argue that ethnography is best understood as a reflexive process What this means is that we must recognize that social research is part of the world that it studies From an outline of the principle of reflexivity the authors go on to discuss and exemplify main features of ethnographic work including the selection and sampling of cases the problems of access observation and interviewing recording and filing data the process of data analysis and writing research reports Throughout the discussion draws on a wide range of illustrative material from classic and more recent studies within a global context The new edition of this popular textbook will be an indispensable resource for students and researchers utilizing social research methods in the The SAGE Handbook of Fieldwork Dick Hobbs, Richard Wright, 2006-01-26 Fieldwork social sciences and cultural studies is widely practiced but little written about yet accounts of the exotic mundane complex and often dangerous are central to not only sociology and anthropology but also geography social psychology and criminology This handbook presents the first major overview of this method in all its variety introducing the reader to the strengths weaknesses and real world applications of fieldwork techniques In the Field Robert G. Burgess, 2002-11-01 First Published in 2004 An authoritative quide to the problems and procedures associated with data collection and analysis in field research Culture, Media, **Language** Stuart Hall, Dorothy Hobson, Andrew Lowe, Paul Willis, 2003-09-02 First published in 2004 A collection of the pioneering work from The Centre for Contemporary Cultural Studies The Fundamentals of Human Factors Design for Volunteered Geographic Information Christopher J. Parker, 2014-01-03 This book explores the roles in which volunteered and professional information play within neogeography from a human factors perspective The unique advantages of each information type are considered alongside how they may be utilised to create products and services delivering highly functional efficient and satisfying experiences to their users The overall aim of this book is to address the issue of how Volunteered Geographic Information VGI can be combined with Professional Geographic Information PGI to satisfy the information search requirements of consumer users via highly usable mashups Firstly this required the development of an understanding of the way different users perceive VGI and PGI in terms of its benefits to their activities and information needs Secondly the benefits that VGI may bring to the user experience of a mashup which cannot be attained through the use of PGI needed to be understood In order to achieve this a user centred design perspective was implemented throughout the Televised Presidential Debates and Public Policy Sidney Kraus, 2013-10-11 With this second edition Kraus research continues his examination of formal presidential debates considering the experience of television in presidential elections

reviewing what has been learned about televised debates and evaluating that knowledge in the context of the election process specifically and the political process generally He also examines the media and the role they occupy in presidential elections Because critics often refer to the Lincoln Douglas debates when reproaching presidential debates comparisons of the two are discussed throughout the book Much of the data and information for this accounting of televised presidential debates comes from the author's first hand experience as one who was involved with these debates as a participant observer on site at nearly all of the debates discussed Throughout these discussions emphasis is placed on the implications for public policy To suggest policy that will be accepted and adopted by politicians and the public is at best difficult Proposals for changes in public policy based on experience even when scientific data support those changes must be subjected to an assessment of the values and predispositions of the proponent These values and predispositions however may not necessarily inhibit the proponent's objectivity As such this review of television use in the presidential election process provides the context for examining televised debates Qualitative Research for the Information Professional G. this has to be the starting point for anyone looking to understand the field in substantive topic theoretical tradition and methodology SRA News Ethnography is one of the chief research methods in sociology anthropology and other cognate disciplines in the social sciences This Handbook provides an unparalleled critical guide to its principles and practice The volume is organized into three sections The first systematically locates ethnography firmly in its relevant historical and intellectual contexts The roots of ethnography are pinpointed and the pattern of its development is demonstrated The second section examines the contribution of ethnography to major fields of substantive research The impact and strengths and weaknesses of ethnographic method are dealt with authoritatively and accessibly The third section moves on to examine key debates and issues in ethnography from the conduct of research through to contemporary arguments The result is a landmark work in the field which draws on the expertise of an internationally renowned group of interdisciplinary scholars The Handbook of Ethnography provides readers with a one stop critical guide to the past present and future of ethnography It will quickly establish itself as the ethnographer's bible **Representations of Death** Mary Bradbury,2012-11-12 PUBLICITY TITLE First book to take the reader through medical bureaucratic commercial and ritual aspects of death Illustrated with original and professional photography Draws on conversations with staff in hospitals registry offices funeral parlours and cemeteries
