Experimental Psycholinguistics (PLE: Psycholinguistics) Sam Glucksberg, Joseph H. Danks, 2013-10-23 How is speech produced and understood in the context of everyday communication First published in 1975 this book is considered one the best of the early books in this field The task of psycholinguistics is to discover how people produce and comprehend speech This encompasses virtually all aspects of psychology including perceptual conceptual and social processes The authors tried to capture the flavour of this approach to the psychology of language by describing the major contemporary issues problems and phenomena of the time being dealt with in laboratories and in field studies and by trying to make sense of the data they had Experimental Psycholinguistics An Introduction does not try to deal exhaustively with any one issue in linguistics or in psychology Rather it tries to integrate the authors knowledge of language and language behaviour so that someone entering the field has an intelligible framework with which to start [Experimental Psycholinguistics](#) Sam Glucksberg, Joseph H. Interference and Inhibition in Cognition Charles J. Brainerd, Frank N. Dempster, 1995-02-08 Life scientists have long been familiar with the notion of interference and inhibition in biological systems 3 4 most notably in the neuron Now these concepts have been applied to cognitive psychology to explain processes in attention learning memory comprehension and reasoning Presenting an overview of research findings in this realm Interference and Inhibition in Cognition discusses what processes are sensitive to interference individual differences in interference sensitivity and how age and experience factor into one's ability to inhibit interference Provides empirical and theoretical perspectives Discusses how inhibition and interference change with age and experience Illustrates the ways in which interference affects language processing attention perception learning and memory

Coherence in Spontaneous Text Morton Ann Gernsbacher, T. Givón, 1995-03-23 The main theme running through this volume is that coherence is a mental phenomenon rather than a property of the spoken or written text or of the social situation Coherence emerges during speech production and comprehension allowing the speech receiver to form roughly the same episodic representation as the speech producer had in mind In producing and comprehending a text be it spoken or written the interlocutors collaborate towards coherence They negotiate for a common ground of shared topicality reference and thematic structure thus toward a similar mental representation of the text In conversation the negotiation takes place between the present participants In writing or oral narrative the negotiation takes place in the mind of the text producer between the text producer and his/her mental representation of the mind of the absent or inactive interlocutor The cognitive mechanisms that underlie face to face communication thus continue to shape text production and comprehension in non interactive contexts Most of the papers in this volume were originally presented at the Symposium on Coherence in Spontaneous Text held at the University of Oregon in the spring of 1992

Metaphor Jeffery S. Mio, Albert N. Katz, 2018-10-24 Research

on metaphor has been dominated by Aristotelian questions of processes in metaphor understanding Although this area is important it leaves unasked Platonic questions of how structures of the mind affect such processes Moreover there has been relatively little work on how metaphors affect human behavior Although there are numerous postdictive or speculative accounts of the power of metaphors to affect human behavior in particular areas such as clinical or political arenas empirical verification of these accounts has been sparse To fill this void the editors have compiled this work dedicated to empirical examination of how metaphors affect human behavior and understanding The book is divided into four sections metaphor and pragmatics clinical uses of metaphor metaphor and politics and other applications of metaphor Chapters contained within these sections attempt to merge Aristotelian questions with Platonic ones Theme and Rheme Alvin Leong Ping, 2004 This book argues for the inclusion of a cognitive psychological component in the analysis of theme and rheme the basic building blocks of the message structure of language The inference boundary IB model is presented and justified as an explanatory model of the message structure of the clause and above it the text It views theme as an element that is capable of generating a boundary of acceptability within which it is permissible for the rheme to occur It explains why and how an initial element is considered to be thematic The IB model also acknowledges the operation of a principle the principle of acceptable message development that underlies all that we say and write This principle forms the basis of a simple test to identify and delimit the thematic portion The Social and Psychological Contexts of Language R. N. St. Clair, H. Giles, 2013-05-13 Published in the year 1982 The Social and Psychological Contexts of Language is a valuable contribution to the field of Social Psychology

Social Cognition and Communication Joseph P. Forgas, Orsolya Vincze, János László, 2013-07-31 Language is the essence of interpersonal behavior and social relationships and it is social cognitive processes that determine how we produce and understand language However there has been surprisingly little interest in the past linking social cognition and communication This book presents the latest cutting edge research from a select group of leading international scholars investigating the how language shapes our thinking and how social cognitive processes in turn influence language production and communication The chapters represent diverse perspectives of investigating the links between language and communication including evolutionary linguistic cognitive and affective approaches as well as the empirical analysis of written and spoken narratives New methodologies are presented including the latest techniques of text analysis to illuminate the psychology of individual language users and entire cultures and societies The chapters address such questions as how are cognitive and identity processes reflected in language How do affective states influence language production Are politeness norms in language use effective How do partners manage to accommodate to each other's communicative expectations What is the role of language as a medium of interpersonal and intergroup influence How are individual and cultural identities reflected in and shaped by narratives in literature school texts and the media The book is aimed at all students researchers and laypersons interested in the interplay between thinking and communication and should be required
