

# WHAT IS GEOGRAPHY?

Geography is the study of places and the relationships between people and their environments.

A geographer is a physical scientist, social scientist or humanist whose area of study is geography. They explore the physical properties of Earth and the human behaviour across it.

There are three types of geography: physical geography (*the effects it has on people and the environment*), human geography (*concerned with people*) and environmental geography (*how people behaviour can affect the environment*).

**Theory and Explanation in Geography** Henry Wai-chung Yeung, 2023-08-15 THEORY AND EXPLANATION IN GEOGRAPHY With this book Henry Yeung puts Geography back into the driver s seat of new theory development Foregrounding mid range theories and mechanism based explanations he offers a pragmatic approach that has the capacity to shape the wider social sciences for years to come The timing of this intervention is pitch perfect as scholars search for ways to understand and intervene in an increasingly distrustful and polarized world KATHARYNE MITCHELL Distinguished Professor University of California Santa Cruz USA In Theory and Explanation in Geography Yeung presents us with a rare thing an argument for geographical theory with forms of causal explanation at its heart The book is both modest and ambitious Modest in its insistence on mid level theory without a call for some new turn or advocacy for any particular approach Ambitious in its insistence that existing theoretical traditions are inadequate or incomplete insofar as they lack causal explanatory power Geographers will be inspired and or infuriated by Yeung s arguments in this provocative and cogently argued call to theoretical arms for many years to come Tim Cresswell Ogilvie Professor of Geography University of

Edinburgh UK Critical human geography possesses a distinctive theory culture pluralist creative distributed restless contested prone to turning wary of orthodoxies and fixed positions In this original and provocative contribution the leading economic geographer Henry Yeung steps out beyond his home turf to engage styles and practices of theorizing across this diverse field carving out a new remit and rubric for middle range theorizing JAMIE PECK Canadian Research Chair and Distinguished University Scholar University of British Columbia Canada Grounded in a generous reading of a multitude of critical approaches in human geography and their diverse conceptions of theory Theory and Explanation in Geography draws upon cutting edge debates on the mechanism based approach to theory and explanation in analytical sociology political science and the philosophy of social sciences to inform current and future geographical thinking on theory This consolidated conceptual work represents an extension and much further development of the author s well cited works on relational geography critical realism and causal explanation process based methodology globalization and the theory of global production networks and theorizing back and situated knowledges that were published in leading journals in Geography The work has several chapters that identify new directions for Geography s current and future engagement with the wider social sciences and relevant research agendas in geographical thought Its main chapters provide the necessary conceptual toolkits for mobilizing such an expanding research program in the 2020s and beyond Compared to typical texts on geographical thought this book is less retrospective and historical and more prospective in nature Detailing why and how mid range explanatory theories can be better developed through causal mechanisms and relational thinking that have been revitalized in the social sciences Theory and Explanation in Geography is an essential read for academics geographers and scholars seeking unique perspective on an important facet of the field
