Eden's Garden Richard J. Coleman, 2007 The time is ripe for a robust discussion of human nature In Eden's Garden Rethinking Sin and Evil in an Era of Scientific Promise Richard Coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior This work is not an anti science polemic but rather an argument to show how sin and evil can make sense to the nonreligious mind and how it is valuable to make sense of such phenomena The author reconceptualizes sin and evil as indelible pieces of our evolutionary history preventing them from being ostracized as too religious without substance mired in the past Coleman redeems theology for what it can offer to the understanding of sin and evil while embracing and respecting what science can offer to further the common good Examining themes in religion philosophy and theology it is ideal for use in the numerous courses that move across these disciplines

Eden's Angels - Books 1-2 Gary Beene, 2023-06-06 The first two books in Eden's Angels a series of science fiction novels by Gary Beene now available in one volume Alien Genesis In 1954 Ensign James Cortell wakes up from a coma with memories of an alien scientist who had visited Earth some fifty thousand

years ago Earth's extraterrestrial visitors altered Homo sapiens DNA to produce modern humans and soon the industrialist overlords among the alien race realized that genetically altered humans offered a source of cheap labor. A galactic slave trade is born. When a mutation begins causing gigantism among some of the sapiens, Dr. Kadeya and her grandson Ramuell travel to Earth in order to rectify the situation. As the scientific and industrialist factions of Earth's rulers clash, Kadeya and Ramuell are caught in the middle. But behind the scenes, an even greater power is at play: Alien Exodus. In their quest to seed the cosmos with sentient alien scientists created the first modern humans by altering Homo sapiens DNA. However, the alien race's noble intentions were derailed by greed and power lust, leading to the birth of a galactic slave trade and a war that spanned multiple worlds. In the midst of this chaos, the Nefilim Project staff were forced to adopt a shocking strategy to correct the flawed genetic manipulation. Failure was not an option, but were they prepared to pay the price of success?

Inventing Americans in the Age of Discovery Michael Householder, 2016-05-06 *Inventing Americans in the Age of Discovery* traces the linguistic, rhetorical, and literary innovations that emerged out of the first encounters between Europeans and indigenous peoples of the Americas. Through analysis of six texts, Michael Householder demonstrates the role of language in forming the identities or characters that permitted Europeans, English speakers primarily, to adapt to the unusual circumstances of encounter. Arranged chronologically, the texts examined include John Mandeville's *Travels*, Richard Eden's English language translations of the accounts of Spanish and Portuguese discovery and conquest, George Best's account of Martin Frobisher's voyages to northern Canada, Ralph Lane's account of the abandonment of Roanoke, John Smith's writings about Virginia, and John Underhill's account of the Pequot War. Through his analysis, Householder reveals that English colonists did not share a universal, homogenous view of indigenous Americans as savages, but that the writers, confronted by unfamiliar peoples and situations, resorted to a mixed array of cultural beliefs, myths, and theories to put together workable explanations of their experiences, which then became the basis for how Europeans in the colonies began transforming themselves into Americans. *Essentials of Strategic Management* Martyn R. Pitt, Dimitrios

Koufopoulos, 2012-03-28 This is a fantastically well-written text which incorporates the latest thinking on strategic management. Striking a balance between theory and application, it is extremely readable and loaded with a wide range of case studies. An essential source for undergraduate, postgraduate, and professional courses on strategic management. Dr. Tahir Rashid, Lecturer in Strategy and Marketing, Salford Business School, University of Salford. This exciting new textbook is built on the belief that strategic management principles are more straightforward than they seem. Unlike other textbooks, it does not overcomplicate the discussion with enigmatic layers of theory or irrelevant perspectives from other disciplines. Instead, you will find focused, clearly articulated coverage of the key topics of strategic management, encouraging critical reflection and deeper exploration on your own terms. Fully developed to cover the essentials of any strategic management course, this textbook not only creates understanding of the principles of strategy but shows you how to apply them constructively in the
