**Exploring Topics in the History and Philosophy of Logic** George Englebretsen, 2015-09-14 While post Fregean logicians tend to ignore or even denigrate the traditional logic of Aristotle and the Scholastics new work in recent years has shown the viability of a renewed extended and strengthened logic of terms that shares fundamental features of the old syllogistic A number of logicians following the lead of Fred Sommers have built just such a term logic It is a system of formal

logic that not only matches the expressive and inferential powers of today's standard logic but surpasses it and is far simpler and more natural. This book aims to substantiate this claim by exhibiting just how the term logic can shed need light on a variety of challenges that face any system of formal logic.

The planets fascinate us and naturally we care about our own Earth and things like how well we can forecast the weather and whether climate is really changing. *Exploring the Planets* offers a personal account on how the space programme evolved. It begins in the era of the first blurry views of our Earth as seen from space and ends with current plans for sophisticated robots on places as near as our neighbours Venus and Mars and as far away as the rainy lakelands of Saturn's planet sized moon Titan. Examining the scientific goals of these complex voyages of discovery and the joys and hardships of working to achieve them. The Space Age is now about 50 years old and for those lucky enough to be part of it at its inception it's filled a worklong lifetime. Today several satellites around the Earth have studied the atmosphere and the climate using instruments on board that the author helped design and build. Deep space missions were embarked upon to visit the planets all of the major bodies six planets the Moon and minor bodies asteroids and comets of the classical Solar System have been scrutinised close up by experiments built in various laboratories worldwide. Most of the narrative is based on the author's experiences at the world's space agencies research labs and conferences and at other places as diverse as Cape Canaveral and No 10 Downing Street.
