Explorations A Sense Of History:

Explorations in World History Niv Horesh, 2023-07-31 This book provides an analysis of the latest research findings in the field of world history and includes terse articulations of modernity vis vis empire In doing so the author brings together insights from both the disciplines of history and international relations into world systems emphasising economic aspects and offering a road map for the evolution of the field of world history The book achieves this by critically analysing the works of Peter Fibiger Bang Christopher Alan Bayly Walter Scheidel Krishnan Kumar Xin Fan Christopher A Ford and Diego Olstein The author includes discussions such as how the Roman empire impacted all subsequent Western empires both early and modern and current debates in world history and politics such as China s rise **Explorations In Environmental History**

Samuel P. Hays, 1998-02-15 Samuel P Hays is one of the most distinguished scholars in the field of environmental history and the leading thinker of its first generation The range and quality of the scholarship collected here reflect his work as a teacher scholar and activist writing in environmental history and provide a powerful exclamation point to a long and distinguished career The depth of Hays s research is evident on every page of this collection He was not one who published just to publish he wrote what was important and spoke to the heart of continuing debates about the environment from 1959 with the publication of *Conservation and the Gospel of Efficiency* to the present day As well as representing his best work from the past four decades this collection includes four pieces published here for the first time One of these the opening essay is Hay s autobiographical account of his encounters with many participants in environmental studies and those vigorously involved in contemporary environmental politics Amid the entire series of environmental dramas that have engaged his attention he has sought to establish the case that a perspective of change and evolution over time the focus of the historian can be of immense value in informing the ongoing debates over environmental affairs This arguement runs through this work **Explorations**

in Cultural History T. G. Ashplant, Gerry Smyth, 2001-03-20 History is an invention in the present as much as a representation and interpretation of the past This has opened up innovative approaches to the research and writing of history and it is the two ideas central to this theme that culture is historically conditioned and history culturally conditioned that this book explores Both theoretical and practical in its approach this volume explains the development of cultural history and its impact on current teaching Part One examines the ways in which conceptions of historical meaning have been challenged via developments in a range of disciplines including literary and linguistic theory history sociology anthropology media and cultural studies Part Two looks at four case studies drawn from America and Britain the Vietnam Veterans Memorial the music of the Beatles the social documentary of George Orwell and the political polemics of nineteenth century British radical women *Transgender Narratives: An In-Depth Exploration of History and Identity* Douglass Parker, In this groundbreaking book the hidden stories and multifaceted experiences of transgender individuals throughout history are brought to light The narrative weaves together historical accounts personal testimonies and thought provoking analyses to provide an

A History of Women in Astronomy and Space Exploration Dale DeBakcsy,2023-05-31 For the last four hundred years women have played a part far in excess of their numerical representation in the history of astronomical research and discovery It was a woman who gave us our first tool for measuring the distances between stars and another who told us for the first time what those stars were made of It was women who first noticed the rhythmic noise of a pulsar the temperature discrepancy that announced the existence of white dwarf stars and the irregularities in galactic motion that informed us that the universe we see might be only a small part of the universe that exists And yet in spite of the magnitude of their achievements for centuries women were treated as essentially second class citizens within the astronomical community contained in back rooms forbidden from communicating with their male colleagues provided with repetitive and menial tasks and paid starvation wages This book tells the tale of how in spite of all those impediments women managed by sheer determination and genius to unlock the secrets of the night sky It is the story of some of science s most hallowed names Maria Mitchell Caroline Herschel Vera Rubin Nancy Grace Roman and Jocelyn Bell Burnell and also the story of scientists whose accomplishments were great but whose names have faded through lack of use Queen Seondeok of Korea who built an observatory in the 7th century that still stands today Wang Zhenyi who brought heliocentrism to China Margaret Huggins who perfected the techniques that allowed us to photograph stellar spectra and thereby completely changed the direction of modern astronomy and Hisako Koyama whose multi decade study of the sun s surface is as impressive a feat of steadfast scientific dedication as it is a rigorous and valuable treasure trove of solar data A History of Women in Astronomy and Space Exploration is not only a book however of those who study space but of those who have ventured into it from the fabled Mercury 13 whose attempt to join the American space program was ultimately foiled by betrayal from within to mythical figures like Kathryn Sullivan and Sally Ride who were not only pioneering space explorers but scientific researchers and engineers in their own rights aided in their work by scientists like Mamta Patel Nagaraja who studied the effects of space upon the human body and computer programmers like Marianne Dyson whose simulations prepared astronauts for every possible catastrophe that can occur in space Told through over 130 stories spanning four thousand years of humanity s attempt to understand its place in the cosmos A History of Women in Astronomy and Space Exploration brings us at last the full tale of women s evolution from instrument makers and calculators to the theorists administrators and explorers who have while receiving astonishingly little in return given us quite literally the universe
