Explorations The Twentieth Century Volume 7:

The 20th Century A-GI Frank N. Magill, 2013-05-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography **Exploring the Unknown,**

Peter J Kitson, William Baker, 2021-12-16 A collection of writings on travels undertaken in the Victorian era The texts collected in these volumes show how 19th century travel literature served the interests of empire by promoting British political and economic values that translated into manufacturing goods [New Spaces of Exploration](#) Simon Naylor, James R. Ryan, 2009-12-18 For many the dawn of the twentieth century ushered in an era where the world map had few if any blank spaces left to discover The age of exploration was supposedly dead New Spaces of Exploration challenges this assumption Focusing specifically on exploration in the twentieth century the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world Ranging widely in their geographical focus from the Europe and Asia to Australia and from the polar regions to outer space they demonstrate the increasing diversity of modern exploration and reveal the continuing political military industrial and cultural motivations at play The result is a major contribution to our understanding of the significance of exploration in the twentieth century Contributors include E Baigent C Collis K Dodds F Driver M Godwin J Hill F Korsmo F MacDonald S Naylor J Ryan N Thomas and K Yusoff **The New Werner Twentieth Century Edition of the Encyclopaedia Britannica**, 1905

Illustrated with Hundreds of Portraits and Other Engravings, 1905 *Age of Exploration* Elisabeth Kaske, Elisabeth Köll, 2024-08-19 In the early twentieth century Chinese intellectuals came to realize that Westerners surpassed them not only in knowledge of the world but also in knowledge of China itself A rising generation of Chinese scientists engineers and administrators was eager to address this state of affairs and began to retrace the footsteps of Western explorers who had crisscrossed China during the preceding century The nine case studies assembled in this book show how a new cohort of professional Chinese explorers traveled studied appropriated and reshaped national space from the 1920s to the 1950s In some instances the explorers drew directly from the fieldwork practices of their Western predecessors In others they trained

compilers to collect and systematize local knowledge that could be passed up the administrative hierarchy to government and national institutions Their projects helped to claim natural resources prepare for infrastructural development and create new institutionalized knowledge and public engagement with textual representations of China s geobody This book elucidates the ways in which knowledge production in early twentieth century China centered on space and contributed to China s transformation into a modern nation state History by Numbers Pat Hudson,Mina Ishizu,2016-11-17 Fully updated and carefully revised this new 2nd edition of History by Numbers stands alone as the only textbook on quantitative methods suitable for students of history Even the numerically challenged will find inspiration Taking a problem solving approach and using authentic historical data it describes each method in turn including its origin purpose usefulness and associated pitfalls The problems are developed gradually and with narrative skill allowing readers to experience the moment of discovery for each of the interpretative outcomes Quantitative methods are essential for the modern historian and this lively and accessible text will prove an invaluable guide for anyone entering the discipline Music and International History in the Twentieth Century Jessica C. E. Gienow-Hecht,2015-04-01 Bringing together scholars from the fields of musicology and international history this book investigates the significance of music to foreign relations and how it affected the interaction of nations since the late 19th century For more than a century both state and non state actors have sought to employ sound and harmony to influence allies and enemies resolve conflicts and export their own culture around the world This book asks how we can understand music as an instrument of power and influence and how the cultural encounters fostered by music changes our ideas about international history **Higher and Colder** Vanessa Heggie,2019-08-02 During the long twentieth century explorers went in unprecedented numbers to the hottest coldest and highest points on the globe Taking us from the Himalaya to Antarctica and beyond Higher and Colder presents the first history of extreme physiology the study of the human body at its physical limits Each chapter explores a seminal question in the history of science while also showing how the apparently exotic locations and experiments contributed to broader political and social shifts in twentieth century scientific thinking Unlike most books on modern biomedicine Higher and Colder focuses on fieldwork expeditions and exploration and in doing so provides a welcome alternative to laboratory dominated accounts of the history of modern life sciences Though centered on male dominated practices science and exploration it recovers the stories of women s contributions that were sometimes accidentally and sometimes deliberately erased Engaging and provocative this book is a history of the scientists and physiologists who face challenges that are physically demanding frequently dangerous and sometimes fatal in the interest of advancing modern science and pushing the boundaries of human ability French Exploration and Settlements in North America, and Those of the Portuguese, Dutch, and Swedes, 1500-1700 Justin Winsor,1884 **English Exploration and Settlement in North America, 1497-1689** ,1884 **Aspects of India's International Relations, 1700 to 2000** Jayanta Kumar Ray,2007 This Volume Is A Modernist Study Of India S International Relations Which Traverses Pre Colonial Colonial
