Exploratorium The Museum As Laboratory:

EXPLORATORIUM Hilde S. Hein, 1990-05-17 Hein gathers ten years of research to tell the complete story of this pioneer facility in the participatory museum movement She begins with the museum's charismatic founder Frank Oppenheimer and his often controversial ideas on the role of the museum

Reshaping Museum Space Suzanne Macleod, 2005 Reshaping Museum Space pulls together the views of an international group of museum professionals architects designers and academics highlights the complexity significance and malleability of museum space and provides reflections upon recent developments in museum architecture and exhibition design Various chapters concentrate on the process of architectural and spatial reshaping and the problems of navigating the often contradictory agendas and aspirations of the broad range of professionals and stakeholders involved in any new project Contributors review recent new build expansion and exhibition projects questioning the types of museum space required at the beginning of the twenty first century and highlighting a range of possibilities for creative museum design Essential reading for anyone involved in creating designing and project managing the development of museum exhibits and vital reading for students of the discipline

The Museum in America Edward P. Alexander, 2000-01-01 The Museum in America captures the life stories of thirteen visionary museum leaders who helped transform the 19th century's collection of curios into today's institution of public service and education In the lively style of Museum Masters Alexander recounts the stories of pioneers in American history science art and general museums For anyone interested in the history of the museum this volume is the place to start

The Museum in Transition Hilde S. Hein, 2014-07-15 During the past thirty years museums of all kinds have tried to become more responsive to the interests of a diverse public With exhibitions becoming people centered idea oriented and contextualized the boundaries between museums and the real world are eroding Setting the transition from object centered to story centered exhibitions in a philosophical framework Hilde S Hein contends that glorifying the museum experience at the expense of objects deflects the museum's educative ethical and aesthetic roles Referring to institutions ranging from art museums to theme parks she shows how deployment has replaced amassing as a goal and discusses how museums now actively shape and create values

Exhibitions as Research Peter Bjerregaard, 2019-08-13 Exhibitions as Research contends that museums would be more attractive to both researchers and audiences if we consider exhibitions as knowledge in the making rather than platforms for disseminating already established insights Analysing the theoretical underpinnings and practical challenges of such an approach the book questions whether it is possible to exhibit knowledge that is still in the making whilst also considering which concepts of knowledge apply to such a format The book also considers what the role of audience might be if research is extended into the exhibition itself Providing concrete case studies of projects where museum professionals have approached exhibition making as a knowledge generating process the book considers tools of application and the challenges that might emerge from pursuing such an approach Theoretically the volume analyses the emergence of

exhibitions as research as part of recent developments within materiality theories object oriented ontology and participatory approaches to exhibition making Exhibitions as Research will be of interest to academics and students engaged in the study of museology material culture anthropology and archaeology It will also appeal to museum professionals with an interest in current trends in exhibition making

The Museum's Borders Simon Knell, 2020-10-07 The Museum's Borders demonstrates that museum practices are deeply entangled in border making patrol mitigation and erasure and that the border lens offers a new tool for deconstructing and reconfiguring such practices Arguing that the museum is a critical institution for the operation of knowledge based democracies Knell investigates how they have been used by scientists art historians and historians to construct our bordered world Examining the role of museums in the Windrush scandal in Britain the exclusion of Black artists in America ideological and propaganda discourses in Europe and China and the remembering of contested pasts in the Balkans Knell argues for the importance of museums in countering unethical nationalistic post fact political discourse Using the principles of Knell's Contemporary Museology The Museum's Borders considers the significance of the museum for societies that wish to know and remember in ways that empower citizens and build cohesive societies The book will be of great interest to students and academics engaged in the study of museums and heritage art history science studies cultural studies anthropology memory studies and history It is required reading for museum professionals seeking to adopt non discriminatory practices

Artifacts, Representations and Social Practice C. Gould, Robert S. Cohen, 2012-12-06 The essays collected here in honor of Marx Wartofsky's sixty fifth birthday are a celebration of his rich contribution to philosophy over the past four decades and a testimony to the wide influence he has had on thinkers with quite various approaches of their own His diverse philosophical interests and main themes have ranged from constructivism and realism in the philosophy of science to practices of representation and the creation of artifacts in aesthetics and from the development of human cognition and the historicity of modes of knowing to the construction of norms in the context of concrete social critique Or again in the history of philosophy his work spans historical approaches to Hegel Feuerbach and Marx as well as contemporary implications of their work and in applied philosophy problems of education medicine and new technologies Marx's philosophical theorizing moves from the highest levels of abstraction to the most concrete concern with the everyday and with contemporary social and political reality And perhaps most notably it is acutely sensitive to the importance of historical development and social practice As a student of John Herman Randall Jr and Ernest Nagel at Columbia Marx developed an exemplary background in both the history of philosophy and systematic philosophy and subsequently combined this with a wide acquaintance with analytic philosophy He is at once aware of the requirements of system and of the need for rigorous and careful detailed argument

Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing Section I examines the beginnings of museums with chapters

dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums Emphasis is on museums in the United States with some historical framing beyond the U S Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy Advocating for change rather than death to museums Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going Entirely new to this edition Section III Museum Aspirations features five new chapters each centered around topics rather than a museum type or museum function Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future The chapters examine museums from the inside museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible

Art in Science Museums Camilla Rossi-Linnemann, Giulia de Martini, 2019-11-28 Art in Science Museums brings together perspectives from different practitioners to reflect on the status and meaning of art programmes in science centres and museums around the world Presenting a balanced mix of theoretical perspectives practitioners reflections and case studies this volume gives voice to a wide range of professionals from traditional science centres and museums and from institutions born with the very aim of merging art and science practices Considering the role of art in the field of science engagement the book questions whether the arts might help curators to convey complex messages foster a more open and personal approach to scientific issues become tools of inclusion and allow for the production of totally new cultural products The book also includes a rich collection of projects from all over the world synthetically presenting cases that reveal very different approaches to the inclusion of art in science programmes Art in Science Museums should be of great interest to academics researchers and postgraduate students working in the fields of museum studies cultural heritage management material culture science communication and contemporary art It should also be essential reading for museum professionals looking to promote more reflective social science engagement in their institutions

Cognitive Development in Museum Settings David M. Sobel, Jennifer L. Jipson, 2015-10-30 Researchers in cognitive development are gaining new insights into the ways in which children learn about the world At the same time there

has been increased recognition of the important role that visits to informal learning institutions plays in supporting learning Research and practice pursuits typically unfold independently and often with different goals and methods making it difficult to make meaningful connections between laboratory research in cognitive development and practices in informal education Recently groundbreaking partnerships between researchers and practitioners have resulted in innovative strategies for linking findings in cognitive development together with goals critical to museum practitioners such as exhibit evaluation and design Cognitive Development in Museum Settings offers an account of ways in which researchers in cognitive development partner with museum practitioners Each chapter describes a partnership between academic researchers and museum practitioners and details their collaboration the important research that has resulted from their partnership and the benefits and challenges of maintaining their relationship This approach illustrates cutting edge developmental science but also considers how researcher practitioner interactions affect research outcomes and provide insight to questions common to practitioners In addition each set of researchers and practitioners discusses issues brought up by the partnership by posing questions concerning research practice partnerships and research evidence considering whether and how cognitive development research conducted in museum settings aligns with larger disciplinary interests in that field and examining to what extent museum practitioners benefit from applying research on the development of cognitive processes to their educational practices

Life on Display Karen A. Rader, Victoria E.M. Cain, 2014-10-03 Rich with archival detail and compelling characters *Life on Display* uses the history of biological exhibitions to analyze museums shifting roles in twentieth century American science and society Karen A Rader and Victoria E M Cain chronicle profound changes in these exhibitions and the institutions that housed them between 1910 and 1990 ultimately offering new perspectives on the history of museums science and science education Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays They describe how these displays of life changed dramatically once again in the 1930s and 1940s as museums negotiated changing often conflicting interests of scientists educators and visitors The authors then reveal how museum staffs facing intense public and scientific scrutiny experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century's last decades A vivid entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth century United States *Life on Display* will appeal to historians sociologists and ethnographers of American science and culture as well as museum practitioners and general readers

Advancements in the Philosophy of Design Pieter E. Vermaas, Stéphane Vial, 2018-03-02 This volume presents 25 essays on the philosophy of design With contributions originating from philosophy and design research and from product design to architecture it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy contributes Coverage zooms in on specific and more well known design disciplines but also includes less studied disciplines such as graphic design interior architecture and exhibition design In addition contributors take up traditional philosophical issues such as epistemology politics phenomenology and philosophy of science Some essays cover philosophical issues that emerge in design for instance what design can do in addressing societal problems while other essays analyze main stream philosophical issues in which design is part of the argument as for instance abduction and aesthetics Readers will discover new research with insightful analyses of design research design thinking and the specificity of design Overall this
