Tibet Michael Buckley, 2018-07-05 This new thoroughly updated edition of Bradt's Tibet encompasses the wider region of ethnic Tibet with more detailed coverage of the Amdo and Kham regions than is found in other guides. It also includes essential information on new border openings and is particularly strong on map data which is extremely difficult to find in Tibet itself including new theme maps covering a range of topics from Tibetan regions to the Three Parallel Rivers UN World Heritage Sites sacred landscapes permafrost and major river sources. Bradt's Tibet benefits from years of consistent research. Michael Buckley has been visiting and researching Tibet for more than 30 years and has a raft of books to his name. Thanks to his knowledge and expertise Bradt's Tibet offers a more extensive language appendix than is found in other guidebooks plus essential guidelines on cultural etiquette including a special section on hand gestures to use local customs and travelling with minimum impact on Tibet's culture and environment. There is also an appendix on fauna and an extensive list of recommended further resources including books music films and even virtual reality. Exploring ethnic Tibet independently is a challenge. The land of snows possesses the world's highest peaks including Everest and its deepest gorges as well as some of the wildest and roughest road routes in high Asia. Bradt's Tibet provides all the practical information you need to explore ethnic Tibet independently whether motoring mountain biking or trekking. Tibet has always fascinated travellers and armchair travellers because it is so difficult to access due to its remoteness and extreme altitude. Now under Chinese rule Tibet is a sensitive destination for Westerners. Visitors need all the information that they can lay their hands on and this guidebook provides plenty. With flight routes and rail access to Tibet expanding and new border crossings opening Michael Buckley and Bradt's Tibet provide all of the information you need to make the most of a trip.

The Explorer's Roadmap to National-Socialism Sarah K. Danielsson,2016-03-16 Whilst terms such as Lebensraum are commonly associated with National Socialist ideology of the 1930s and 40s ideas of racial living space were in fact generated in the previous decades by an international geographic community of explorers and academics Focusing on one of the most influential figures within this group Sven Hedin this is the first study that systematically connects the geographic community to the intellectual history of the development of National Socialist ideology and genocidal practices The book demonstrates how colonial racial and nationalistic policies were often spearheaded by explorers and geographers such as Hedin In Germany Britain France and Russia their positions as publicly recognized authors and reputable academics made them highly influential with politicians Whilst this influence was to become most visible within Hitler s Germany the debates were not by any means restricted to or even originated in Germany Germany was the home of some of the most prominent

geographers but this scientific community had a tradition of international debate and exchange with especially British French and Russian geographic societies and institutions Many issues that were later discussed and championed by National Socialist ideology were aired and debated in this international setting raising important questions about the international character and impact of National Socialism Tracing the intellectual history of the international geographic community and its relationship to National Socialism this study provides an assessment of Hedin s close involvement with the Nazi elite as a culmination of decades of political and scientific work In so doing the book uncovers a long ignored or overlooked important connection between exploration geographers and genocide

Religious Bodies Politic Anya Bernstein,2013-11-27 Religious Bodies

Politic examines the complex relationship between transnational religion and politics through the lens of one cosmopolitan community in Siberia Buryats who live in a semiautonomous republic within Russia with a large Buddhist population Looking at religious transformation among Buryats across changing political economies Anya Bernstein argues that under conditions of rapid social change such as those that accompanied the Russian Revolution the Cold War and the fall of the Soviet Union Buryats have used Buddhist body politics to articulate their relationship not only with the Russian state but also with the larger Buddhist world During these periods Bernstein shows certain people and their bodies became key sites through which Buryats conformed to and challenged Russian political rule She presents particular cases of these emblematic bodies dead bodies of famous monks temporary bodies of reincarnated lamas ascetic and celibate bodies of Buddhist monastics and dismembered bodies of lay disciples given as imaginary gifts to spirits to investigate the specific ways in which religion and politics have intersected Contributing to the growing literature on postsocialism and studies of sovereignty that focus on the body Religious Bodies Politic is a fascinating illustration of how this community employed Buddhism to adapt to key moments of political change
