Vine, Mark A. Faust, 1993 Using an approach developed and refined over a combined 44 years of teaching this book encourages literature teachers at the high school and college levels to empower their students as readers and meaning makers of literature The book presents results of a research study in which 288 students ranging from junior high school to graduate school responded in writing to the same 18 line poem After an introductory section the second section of the book presents in full the writings on the poem prepared by a dozen of these students and then examines the students different approaches to accounting for the general situation of the poem the particular situation and the various voices that the students heard in the poem The third section discusses what disempowers meaning making what empowers meaning making and how teachers might empower readers in their classrooms A concluding section presents continuing reflections RS *Exploring Ancient Skies* David H. Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history
