The Mentalities of Gorillas and

Orangutans Sue Taylor Parker, Robert W. Mitchell, H. Lyn Miles, 1999-08-26 Research on the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution. In contrast, less attention has been paid to the abilities of gorillas and orangutans. This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective. The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees, bonobos, and humans. The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes, including performances in the classic domains of tool use and tool making, imitation, self-awareness, social communication, and symbol use. All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove.

Management of Extreme Situations Pascal Lièvre, Monique Aubry, Gilles Garal, 2019-09-23 In response to the rise of various forms of the extreme in economies, organizations, and societies such as disruptive innovation, climate emergency, financial crisis, high risk sport, etc., an ambitious 21st century program sets the agenda of management sciences around the unknown, disruption, uncertainty, and risk. *Management of Extreme Situations* presents the research results from the conference organized at the Cerisy la Salle International Cultural Center, France, in 2016. It testifies to the existence of an international community that brings together around management sciences various disciplines studying the management concept of extreme situations. Through the analysis of varied contexts (polar and mountain expeditions, fire rescue services, exploration projects in the military field, creative industries, etc.), this book offers an initial grammar of the extreme. It presents a heuristic for the management of these situations, particularly in terms of sensemaking, ambidexterity, and knowledge expansion.
