Exploring Ancient Sounds and Places Margarita Díaz-Andreu, Neemias Santos da Rosa, 2024-12-31

Archaeoacoustics studies historical sound, merging archaeology, anthropology, and psychology to reveal insights about ancient music and acoustic environments. *Exploring Ancient Sounds and Places: Theoretical and Methodological Approaches to Archaeoacoustics* brings together scholars from diverse academic fields including archaeology, anthropology, architecture, classics, history, art history, and sound engineering to shed light on the role of sound and acoustics in the cultural practices of past societies from various chronologies and locations around the world. This innovative volume covers a broad spectrum of topics such as the genesis of archaeological investigations into sound, the emergence of speech and song in early humans, the cognitive effects of music in ritualistic contexts, the acoustic dimensions of rock art sites, and the emotional responses elicited by sonorous activities experienced in these decorated spaces. Additionally, the book delves into the study of prehistoric musical instruments, the use of ethnohistorical sources in archaeoacoustic research, the analysis of sound imagery in medieval frescoes, and explores historical approaches to the study of specific acoustic parameters and the sonic properties of urban environments. Each chapter not only aggregates a wealth of academic perspectives but also bridges the gap between theoretical concepts and the most advanced methods used in this field of research. Case studies from all over the world illustrate the different ways in which ancient communities perceived and engaged with sound and the acoustics of the landscapes in which they were immersed. *Exploring Ancient Sounds and Places* is an essential resource for scholars and students interested in archaeoacoustics and how sound has shaped the cognitive, cultural, and spiritual facets of human societies across time and space.
