Exploring European Soc Po:

Exploring European Social Policy Robert R. Geyer, 2013-05-02 With the growing challenges of economic globalization and national welfare state retrenchment the development and future of EU social policy has become increasingly important This exciting new textbook provides a comprehensive detailed and up to date overview of this contested area and examines whether EU social policy is strengthening or weakening European social policy regimes The book begins with a general outline of the postwar development of EU social policy and its evolving relationship to the theory and practice of European integration Then it provides a detailed and theoretically engaged description of the main areas of EU social policy including labour gender anti poverty anti discrimination elderly disability youth and public health policy There is also a chapter exploring the social policy role of the structural funds particularly the European Social Fund The book concludes by arguing against both sides of the strengthening weakening debate calling for a more subtle analysis of the effects of EU social policy on national social policy regimes This book is the most up to date and comprehensive available and offers the reader a detailed and accessible exploration of the area It will be essential reading for anyone studying the EU or national social policy as well as for practitioners in the field

Exploring the Sociology of Europe Maurice Roche, 2010 This is a discerning and relevant book providing an informed analysis of European society which identifies and defines contemporary issues and engages with key social theoretical perspectives Covering the substantive historical sociological aspects of Europe Part 1 the historical and comparative sociology of the nation state Part 2 and the comparative sociology of welfare capitalism Part 3 Maurice Roche sets out a clear and effective framework for understanding the sociology of Europe

Exploring European Frontiers B. Dolan, 2000-03-02 The explorations of eighteenth century travellers to the European frontiers were often geared to define the cultural political and historical boundaries of European civilization In an age when political revolutions shocked nations into reassessing what separated the civilised from the barbaric how did literary travellers contemplate the characteristics of their continental neighbours Focusing on the writings of British travellers we see how a new view of Europe was created one that juxtaposed the customs and living conditions of populations in an attempt to define modern Europe against a yet unenlightened Europe

European Society Alberto Martinelli, Alessandro Cavalli, 2020-08-03 The EU today is at a crossroads either it becomes a great supranational union or it goes back to being an array of separate independent states Alberto Martinelli and Alessandro Cavalli draw a grand fresco of the society in which the European Union is taking shape Long term social and cultural trends and main current developments in economics and politics are synthetically outlined Key questions of identity and nationalism immigration and inequality welfare and economic governance are thoroughly analysed Main cleavages conflicts of interest and different visions of member states as well as institutional reforms and crisis management strategies are critically discussed A detailed proposal for advancing the process of political integration concludes the volume

Handbook of Exploration Geophysics Paul A. Chapel, 1992-01-01 Geophysics the

excellent exploration tool which traditionally uses the latest techniques has been in great demand and has assisted by remarkable development of the methods which consist of gravimetry electromagnetics and the most important seismic reflection The book is presented like an encyclopedia One may find an exact definition illustrated with simple sketches precise formulae orders of magnitude data which have so often been missing Understanding Western Society, Volume 2: From the Age of Exploration to the Present John P. McKay, Bennett D. Hill, John Buckler, Clare Haru Crowston, Merry E. Wiesner-Hanks, Joe Perry, 2011-07-29 Based on the highly successful A History of Western Society Understanding Western Society A Brief History captures students interest in the everyday life of the past and ties social history to the broad sweep of politics and culture Abridged by 30% the narrative is paired with innovative pedagogy designed to help students focus on significant developments as they read and review An innovative three step end of Chapter study guide helps students master key facts and move toward synthesis *Future Energy Conferences and Symposia*, 1988 **Africa in Europe: Antiquity into the Age of Global Exploration** Stefan Goodwin, 1955-01-01 Africa in Europe in two volumes meticulously documents Europe's African presence from antiquity to the present It incorporates findings from areas of study as diverse as physical anthropology linguistics social history social theory international relations migrational studies and globalization In contrast to most other works focusing on Eurafrican relationships that largely revolve around Atlantic and trans Atlantic developments since the Age of Global Exploration this work has a much broader perspective which takes account of human evolution the history of religion Judaic studies Byzantine studies the history of Islam and Western intellectual history including social theory While the issue of racism in its variant manifestations receives thorough treatment African in Europe is also about human connections across fluid boundaries that are ancient as well as those that date to the Age of Exploration the Age of Revolution and continue until the present Hence it brings new clarity to our understanding of such processes as acculturation and assimilation while deepening our understanding of interrelationships among racism violence and social identities This work is full of new insights fresh interpretations and highly nuanced analyses relevant to our thinking about territoriality citizenship migration and frontiers in a world that is increasingly globalized The author moves across boundaries of time and space in ways that result in an encyclopedic work that is an integrated and programmatic whole as well as one in which each chapter is a complete module of scholarship that is self contained **The Petroleum Exploration of Ireland's Offshore Basins** Geological Society of London, 2001 This text covers a wide range of exploration topics from the regional to the field scale It provides new information on Neogene to recent stratigraphy and sedimentation in the North Atlantic A significant amount of exploration has taken place since the publication of Geological Society special publication no 93 in 1995 **Petroleum Exploration and Exploitation in Norway** Norsk petroleumsförening. Conference, 1995 This conference was arranged by the Norwegian Petroleum Society in order to commemorate the first 25 years of exploration on the Norwegian Continental Shelf Sixty papers and posters were presented of which 25 have been

selected for this volume Since the start of exploration activities during the mid 1960 s the North Sea has not only proved to be one of the main petroleum provinces in the world but has also established itself as an excellent laboratory for geoscientific research and application This development has been stimulated greatly by the openness towards exchange of technical data encouragement by the Norwegian authorities The objective of this book is to assess the results of 25 years of exploration in Norway It focuses on lessons learned from past experiences as well as considering future challenges facing geoscientists in the industry relating to both exploration and exploitation activities Included are papers which assess the status and future trends of exploration in the main geological provinces on the Norwegian Continental Shelf from the Central Graben in the south to Svalbard and the Russian Arctic in the north

Sequence Stratigraphy on the Northwest European Margin R.J. Steel,V.L. Felt,E.P. Johannesson,C. Mathieu,1995-07-04 Sequence Stratigraphy presently one of the most rapidly growing areas in geology is concerned with the documentation and prediction of how sandstones potential hydrocarbon reservoirs and shales potential source rocks are distributed in time and space within sedimentary basins The book takes a critical look at some of the sequence stratigraphy concepts and provides an account of how these have been applied recently in NW Europe North Sea mid Norway and E Greenland Barents Sea and Svalbard mainly in connection with the exploration for oil and gas There is currently no similar book available

European Union and Global Democracy Raffaele Marchetti,Davorka Vidović, **Democracy in the EMU in the Aftermath of the Crisis** Luigi Daniele,Pierluigi Simone,Roberto Cisotta,2017-04-21 The book covers some of the major issues concerning the problematic relationship between respect for democratic principles and the new European Economic Governance Innovative approaches are highlighted throughout the book new frameworks and arrangements are proposed on the basis of efficiency analyses as well as their institutional and legal suitability Though the perspective adopted is essentially a legal one the economic and policy background are also given due consideration The papers presented here offer a balanced mix of empirical including comparative and theoretical analysis several also combine the two approaches carrying out empirical analyses then setting the results against theoretical options Given the relative dearth of literature on democratic principles and the EMU let alone a comprehensive enquiry the book marks a valuable new contribution

Exploring the 'Legal' in Socio-Legal Studies David Cowan,Daniel Wincott,2019-03-01 Socio legal studies have had an ambivalent relationship with the legal one of its defining aspects but at the same time one that the discipline has sought to transcend or even leave behind While socio legal studies benefit hugely from the insights methods and theories of other social science and humanity disciplines the contributions to Exploring the Legal in Socio Legal Studies illustrate the value of a focus on the legal The chapters in this book combine traditional legal materials and analyses with other ways of engaging empirically with the legal They illustrate the rich potential of the legal as a site both for theoretical and methodological reflection and for case study analysis Taken as a whole this volume demonstrates that methodological discussion is most helpful when rooted in empirical cases and that the best case studies

also help us to develop our methodologies Bringing methodology and empirical analysis together offers an opportunity to reflect on socio legal studies and develop the discipline in productive new directions *Improving the Exploration Process by Learning from the Past* K. Ofstad,E.-J. Kittilsen,P. Alexander-Marrack,2000-07-07 Learning by experience is both a part of the daily life and the exploration life A systematic review of the past is essential to improve the exploration process by better managing risks and uncertainties Learning through different disciplines has become a favoured technique With new tools for interpretation and simulation integration and data and the creation of cross discipline teams we can take major step forward in understanding the exploration task and its different elements Global views and lessons learned on the Norwegian Continental Shelf on risk management and retrospective prospect assessment are presented in this book Detailed exploration case histories from the Norwegian Continental Shelf documenting both positive and negative experiences and highlighting the benefits of integrated thinking and methods are presented The impact of the application of various state of the art and developing technologies on portfolio management opportunity evaluation and volumetric and risk assessment of prospects and discoveries are reviewed and the future technological challenges in exploring the remaining hydrocarbon potential of the Norwegian continental Shelf are summarised **The Green Stone Age: Exploration and Exploitation of Minerals for Green Technologies** M. Smelror,K. Hanghøj,H. Schiellerup,2023-06-21 Raw materials have been essential in the development of all human societies through history and moving into a greener more carbon lean future we become increasingly reliant on access to a growing number of raw materials Minerals for new technologies improving the quality of our lives and the environment are the building blocks of the new Green Stone Age This Special Publication presents ongoing research and mapping programmes focusing on minerals needed for the transformation to greener societies In addition to new exploration models and shared geological information on the different prospective currently mined areas the notion of criticality in different countries is discussed and examples of ongoing national and cross country research and mapping programmes are presented In addition to the resource reserve and technical economic aspects the social and environmental dimensions are also a focus in some of the contributions as holistic approaches to the exploration and exploitation of critical minerals and materials are needed to fulfil the green transition and goals for the Green Stone Age **Africa: Geographical Exploration and Christian Enterprise** A. Guarr Forbes,1874 **The Exploration of the World: The great navigators of the eighteenth century** Jules Verne,1880 **Palestine Exploration Fund** Palestine Exploration Fund,1901 **Palestine Exploration Fund** ,1901
