### **Exploring the Links**

between Social Connections, Care and Integration Marcia Vera Espinoza, Arek Dakessian, Clayton Boeyink, 2024-10-18 Integration has in recent decades emerged as the primary policy tool through which the nations of the global north and increasingly the global south shepherd their immigrants to achieve the same social and economic outcomes as natives taking into account their characteristics OECD 2018 Despite scholarship on the importance of social connections to facilitate feelings of belonging and settlement lack of consensus around what integration means has led to bustling critique of the notion as prescribing processes through which migrant others must work their way into acceptance in the body social Moreover scholars recognise that discourses and practices of integration are often used as means to justify accompanying policies of disintegration and exclusion Put differently there is a humanitarian hand that cares and a hand that strikes Frameworks for understanding migration and integration traverse the realms of theory policy and practice and are usually intertwined with discourses and regimes of care and connectedness This Research Topic aims to further unsettle debates around integration and care through an engagement with the value commitments that underlie integration projects and that drive everyday practice and service provision drawing upon perspectives beyond the global north **Discovering New Educational Trends (V3)** Pamela R. Cook, 2019-09-04 This third volume of Discovering New Educational Trends is a textbook of articles and narratives exclusively written to encourage and assist a variety of educational professionals in the disciplines of education health philosophy and psychology It also touches on areas of global awareness humanities and multicultural studies in the social sciences The material and information provided in this text will provide an excellent resource textbook for university coursework and a supplemental reading tool for journal reviews and other assignments It has been specifically designed for educators principals school administrators nutritionists speech pathologists psychologists students teachers and other college and university personnel within a variety of diverse disciplines Meeting the Inclusion Challenge in Innovation Tatiana Iakovleva, Elin M. Oftedal, John Bessant, 2024-11-18 User inclusion in innovation is increasingly the target of policy rhetoric at both organizational and societal levels And extensive research has demonstrated the potential contribution that users can make both at the front end of innovation with their ideas and insights and downstream facilitating adoption and diffusion However translating this potential into practice remains problematic not least because we need to understand more about how to hear user voices amplify their insights and provide practical channels for inclusion to ensure full co creation of innovation Our earlier book from 2019 Responsible Innovation in Digital Health Edward Elgar added to the growing body of knowledge around whether users can be involved and this book opens up the how theme Our work suggested a spectrum of user involvement ranging from those who can participate fully to those who are passive players in the innovation process and we explore in this book different tools techniques and mechanisms for enabling such users to become more involved in the innovation process We look at the concept of boundary innovation spaces as environments in which co creation can be enabled drawing on experience across a wide international research network We

also explore the broader innovation environment the specific networks of actors and their interactions which define the innovation ecosystem where user inclusion may be embedded This book moves the discussion beyond the question of whether users can be more effectively included throughout the innovation process to explore the ways in which this might be enabled

**Queer Lives across the Wall** Andrea Rottmann, 2023-04-28 Queer Lives across the Wall examines the everyday lives of queer Berliners between 1945 and 1970 tracing private and public queer life from the end of the Nazi regime through the gay and lesbian liberation movements of the 1970s Andrea Rottmann explores how certain spaces including homes bars streets parks and prisons facilitated and restricted queer lives in the overwhelmingly conservative climate that characterized both German postwar states With a theoretical toolkit informed by feminist queer and spatial theories the book goes beyond previous histories that focus on state surveillance and the persecution of male homosexuality

Feeling lives: An intersectional exploration of past experiences and present living Lindsay Clowes, LJ Theo, Nadia Sanger, Landa Mabenge, Sisa Ngabaza, 2023-11-15 We each make sense of the world through our embodied feeling lives We do it through the social groupings contexts and processes which history rather than biology presents and assigns to us In this collection we aim to illustrate how these embodied feelings and emotions underpin contemporary theorising by sharing reflective autobiographical writing by individuals from a wide range of backgrounds and contexts This somewhat unruly collection unsettles conventional academic writing precisely because authors have grounded themselves in the tangible and the personal rather than in abstract theory We hope that readers might see aspects of their own lives in some of these stories develop better understandings of lives that are experienced very differently and start or continue to theorise their own lives
