Facilities Management and Corporate Real Estate Management as Value Drivers Per Anker Jensen, Theo van der Voordt, 2016-10-04 Facilities Management FM and Corporate Real Estate Management CREM are two closely related and

relatively new management disciplines with developing international professions and increasing academic attention Both disciplines have from the outset a strong focus on controlling and reducing cost for real estate facilities and related services In recent years there has been a change towards putting more focus on how FM CREM can add value to the organisation This book is driven by the need to develop a widely accepted and easily applicable conceptual framework of adding value by FM and CREM It presents the state of the art of theoretical knowledge and empirical evidence about the impact of buildings and facilities on 12 value parameters and how to manage and measure these values The findings are connected to a new Value Adding Management model The book is research based with a focus on guidance to practice It offers a transdisciplinary approach integrating academic knowledge from a variety of different fields with practical experience It also includes 12 interviews with practitioners shedding light as to how they manage adding value in practice This is a much needed resource for practitioners researchers and teachers from the field of FM and CREM as well as students at both undergraduate and postgraduate level

Public Policy Analysis Wil A. H. Thissen, Warren E. Walker, 2012-10-05

Traditional policy analysis approaches are characterized by a focus on system modeling and choosing among policy alternatives While successful in many cases this approach has been increasingly criticized for being technocratic and ignoring the behavioral and political dimensions of most policy processes In recent decades increased awareness of the multi actor multiple perspective and poly centric character of many policy processes has led to the development of a variety of different perspectives on the styles and roles of policy analysis and to new analytical tools and approaches for example argumentative approaches participative policy analysis and negotiation support As a result the field has become multi faceted and somewhat fragmented Public Policy Analysis New Developments acknowledges the variety of approaches and provides a synthesis of the traditional and new approaches to policy analysis It provides an overview and typology of different types of policy analytic activities characterizing them according to differences in character and leading values and linking them to a variety of theoretical notions on policymaking Thereby it provides assistance to both end users and analysts in choosing an appropriate approach given a specific policy situation By broadening the traditional approach and methods to include the analysis of actors and actor networks related to the policy issue at hand it deepens the state of the art in certain areas While the main focus of the book is on the cognitive dimensions of policy analysis it also links the policy analysis process to the policymaking process showing how to identify and involve all relevant stakeholders in the process and how to create favorable conditions for use of the results of policy analytic efforts by the policy actors The book has as its major objective to describe the state of the art and the latest developments in ex ante policy analysis It is divided into two parts Part I explores and structures policy analysis developments the development and description of approaches to diagnose policy situations design policy analytic efforts and policy process conditions Part II focuses on recent developments regarding models and modeling for policy analysis placing modeling approaches in the context of the variety of conditions and approaches
