Outlines of a Philosophy of Religion

based on Psychology and History Auguste Sabatier, 2019-12-12 In *Outlines of a Philosophy of Religion based on Psychology and History* Auguste Sabatier embarks on an intellectual journey that intertwines psychological insight with historical analysis to explore the nature of religion. This work is characterized by its meticulous scholarship and innovative approach, dissecting the evolution of religious beliefs through the lenses of human experience and cultural context. Written in the late 19th century, Sabatier's treatise reflects the era's burgeoning interest in the intersection of faith and reason, utilizing a synthesis of philosophical rigor and empirical investigation to challenge traditional dogmas. Auguste Sabatier, a distinguished French theologian, philosopher, and scholar in the study of religion, draws from his own deep engagement with both Protestant thought and modern philosophy. Influenced by the intellectual currents of his time, including the impact of Darwinism and the rationalist critiques of religion, Sabatier's endeavor reflects his quest to reconcile faith with the insights of contemporary psychological and historical understanding, providing a fresh perspective on the complexities of belief systems. This enlightening work is highly recommended for readers keen on understanding the intricate interplay between psychology, history, and spirituality. Sabatier invites readers to reflect critically on their own beliefs while offering a framework that respects the depth of human experience in grappling with the divine, making it an essential read for both scholars and those interested in the philosophy of religion.

Philosophical Theology and Christian Doctrine Brian Hebblethwaite, 2005-01-24 *Philosophical Theology and Christian Doctrine* surveys and comments on recent work by philosophers of religion in the analytic tradition on the doctrines of the Christian creed. Topics covered include creation, Incarnation, Trinity, salvation, and eschatology, and the ultimate future of creation. Comprehensive survey of core Christian doctrines.

The Future of the Philosophy of Religion M. David Eckel, C. Allen Speight, Troy DuJardin, 2020-10-12 This collection of essays on the philosophy of religion and its future brings together accomplished thinkers across several related fields, from comparative philosophy to analytic and continental philosophy of religion and beyond. Contributing authors address pressing questions, including: Where does philosophy stand in relation to religion and the study of religion in the 21st century? How ought the philosophy of religion to interact with religious studies and theology to make for fruitful interdisciplinary engagement? And what does philosophy uniquely have to offer to the broad discourse on religion in the modern world? Through exploring these questions and more, the authors' goal is not that of meeting the philosophical future but of forging it. Readers will enter a vivid conversation through engaging essays which demonstrate the importance of disciplinary openness and show that we do not need to sacrifice depth in order to achieve breadth. Modernity and postmodernity come together in a constantly evolving discussion that moves the philosophy of religion forward while keeping an eye toward the experience accumulated in past centuries. This book will interest students of philosophy, theology, religious studies, and other fields that wonder about the place of philosophy and religion in today's world. It also has much to offer advanced scholars in these fields through its breadth and forward thinking.

M.J. Charlesworth, 2002-08 Substantially revised and expanded, this is a new edition of a core text for undergraduates, students, and all those interested in philosophy and religion. **A Companion to Atheism and Philosophy**

Graham Oppy, 2019-03-22 PROSE 2020 Single Volume Reference Finalist Philosophers throughout history have debated the existence of gods, but it is only in recent years that the absence of such a belief has become a significant topic of philosophical analysis. In particular, for philosophers of religion, although it is difficult to trace the historical contours of atheism as the lack of belief in a higher power, the reasoned, reflective, and thoughtful rejection of theism has become commonplace in many modern intellectual circles, including academic philosophy, where disciplinary data indicates that a large majority of philosophers self-identify as atheists. As the first book of its kind to bring together a collection of writing on the philosophical aspects of atheism, both historical and contemporary, the Companion to Atheism and Philosophy stages an explicit, constructive, and comprehensive conversation between philosophy and atheism to examine the ways in which atheist thought intersects with ideas and positions from a variety of philosophical and theological sub-disciplines. The Companion begins by addressing the foundational questions and lingering controversies which underpin philosophical thought about atheism, exploring the implications of major developments in the history of philosophy for the modern atheistic worldview. Divided into eight distinct sections, essays consider a range of thinkers who were widely believed to have been atheists, including David Hume, Mary Wollstonecraft, Karl Marx, and Elizabeth Cady Stanton, and survey different kinds of objections to theism and atheism, including logical, evidential, normative, and prudential. Later chapters trace the relationship between atheism and metaphysics, epistemology, ethics, and political philosophy, oriented around topics such as pragmatism, postmodernism, freedom, education, violence, and happiness. Deftly curated and thoughtfully composed, A Companion to Atheism and Philosophy is the most ambitious and authoritative account of philosophical thinking on atheism available and is a first-rate resource for academics, professionals, and students of philosophy, religious studies, and theology. [The History of Religious Imagination in Christian Platonism](#)

Christian Hengstmann, 2021-03-25 This collection provides the first in-depth introduction to the theory of the religious imagination put forward by renowned philosopher Douglas Hedley, from his earliest essays to his principal writings. Featuring Hedley's inaugural lecture delivered at Cambridge University in 2018, the book sheds light on his robust concept of

religious imagination as the chief power of the soul's knowledge of the Divine and reveals its importance in contemporary metaphysics, ethics and politics. Chapters trace the development of the religious imagination in Christian Platonism from Late Antiquity to British Romanticism, drawing on Origen, Henry More and Samuel Taylor Coleridge, before providing a survey of alternative contemporary versions of the concept as outlined by Karl Rahner, René Girard and William P. Alston, as well as within Indian philosophy. By bringing Christian Platonist thought into dialogue with contemporary philosophy and theology, the volume systematically reveals the relevance of Hedley's work to current debates in religious epistemology and metaphysics. It offers a comprehensive appraisal of the historical contribution of imagination to religious understanding and as such will be of great interest to philosophers, theologians and historians alike. **Persons and Other Things** M.

Glouberman, 2021. The Hebrew Bible is a philosophical testament. Abraham, the first biblical philosopher, calls out to the world in God's name exactly as Plato calls out in the name of the Forms. Abraham comes forward as a critic of pagan thought about specifically persons. Moses, to whom the baton is passed, spells out the practical implications of the Bible's core anthropological teachings. In *Persons and Other Things*, Mark Glouberman explores the Bible's philosophy, roughing out in the course of a defence of it how men and women who see themselves in the biblical portrayal, as he argues that most of us do once the religious glare is reduced, are committed to conduct their personal affairs, arrange their social ties and act in the natural world. *Persons and Other Things* is also the author's testament about the practice of philosophy. Glouberman sets out, and in the chapters that pursue the theme, he puts into practice the lessons he has acquired as a lifelong learner about thinking philosophically about writing philosophy and about philosophers. *Persons and Other Things* looks closely at the Bible as a philosophical work, asking insightful questions about how to interpret the Hebrew Bible, what it means to be Jewish and how to live a meaningful and moral life. *God and Evidence* Rob Lovering, 2013-06-20.

God and Evidence presents a new set of compelling problems for theistic philosophers. The problems pertain to three types of theistic philosopher which Lovering defines here as theistic inferentialists, theistic non-inferentialists and theistic fideists. Theistic inferentialists believe that God exists that there is inferential probabilifying evidence of God's existence and that this evidence is discoverable not simply in principle but in practice. Theistic non-inferentialists believe that God exists that there is non-inferential probabilifying evidence of God's existence and that this evidence is discoverable not simply in principle but in practice. Theistic fideists believe that God exists that there is no discoverable probabilifying evidence, inferential or non-inferential, of God's existence and that it is nevertheless acceptable morally if not otherwise to have faith that God exists. Lovering argues that each type of theistic philosopher faces a problem unique to his type and that they all share two particular problems. Some of these problems take us down an entirely new discursive path, others down a new discursive path branching off from an old one.

The Roots of Religion Roger Trigg, Justin L. Barrett, 2016-02-24. The cognitive science of religion is a new discipline that looks at the roots of religious belief in the cognitive architecture of the human mind. *The Roots of Religion* deals with the

philosophical and theological implications of the cognitive science of religion which grounds religious belief in human cognitive structures religious belief is natural in a way that even scientific thought is not Does this new discipline support religious belief undermine it or is it despite many claims perhaps eventually neutral This subject is of immense importance particularly given the rise of the new atheism Philosophers and theologians from North America UK and Australia explore the alleged conflict between truth claims and examine the roots of religion in human nature Is it less natural to be an atheist than to believe in God or gods On the other hand if we can explain theism psychologically have we explained it away Can it still claim any truth This book debates these and related issues Philosophical Debates Steven M. Cahn, 2021-05-04 This volume completes a trilogy of Steven M Cahn's shorter writings that includes *The Road Traveled and Other Essays* 2019 and *A Philosopher's Journey* 2020 Included here are his contributions to three philosophical debates first whether events are fated to occur second whether God is knowable and third whether morality can conflict with happiness The book contains not only Cahn's essays but also edited versions of the writings to which he is responding thereby putting his remarks into context and rendering them accessible to all These pieces make clear why Professor Cahn is regarded as one of the leading philosophy teachers of his generation **A Philosopher's Journey** Steven M.
