**Revitalizing Urban Neighborhoods** William Dennis Keating, Norman Krumholz, Philip Star, 1996 Since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district However such development has all but ignored the inner city neighborhoods that continue to struggle in the shadows of high rise America This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development Together they show how urban neighborhoods can and must be preserved as economic cultural and political centers

*The Social Impacts of Urban Containment* Arthur C. Nelson, Casey J. Dawkins, 2016-02-24 One of the policies that has been most widely used to try to limit urban sprawl has been that of urban containment These policies are planning controls limiting the growth of cities in an attempt to preserve open rural uses such as habitat agriculture and forestry in urban regions While there has been a substantial amount of research into these urban containment policies most have focused on issues of land use consumption transportation impacts or economic development issues This book examines the effects of urban containment policies on key social issues such as housing wealth building and creation racial segregation and gentrification It argues that while the policies make important contributions to environmental sustainability they also affect affordability for all the economic groups of citizens aside from the most wealthy However it also puts forward suggestions for revising such policies to counter these possible negative social impacts As such it will be valuable reading for scholars of environmental planning social policy and regional

*Bibliography* Arthur James Wells, 2009      **Religion and Community in the New Urban America** Paul David Numrich, Elfriede Wedam, 2015 Religion and Community in the New Urban America examines the interrelated transformations of cities and urban congregations The authors ask how the new metropolis affects local religious communities and what role those communities play in creating the new metropolis Through an in depth study of fifteen Chicago congregations Catholic parishes Protestant churches Jewish synagogues Muslim mosques and a Hindu temple both city and suburban this book describes congregational life and measures congregational influences on urban environments Paul D Numrich and Elfriede Wedam challenge the view held by many urban studies scholars that religion plays a small role if any in shaping postindustrial cities and that religious communities merely adapt to urban structures in a passive fashion Taking into account the spatial distribution of constituents internal traits and external actions each congregation s urban impact is plotted on a continuum of weak to moderate to strong thus providing a nuanced understanding of the significance of religion in the contemporary urban context Presenting a thoughtful analysis that includes maps of each congregation in its social geographic setting the authors offer an insightful look into urban community life today from congregations to the places in which they are embedded      **The Color of School Reform** Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole      **Urban Affairs Bibliography** Bernard H.
