Women and Sex Tourism Landscapes Erin Sanders-McDonagh,2016-08-12 Sexual spaces normally inhabited by mostly female sex workers are understood as masculine spaces and positioned for and around male consumers However red light zones and public sex performances in both Thailand and Holland are being explored and

visually consumed by female tourists in significant numbers Their presence in red light districts and sexual venues is at odds with the ways in which sexual spaces have normally been positioned *Woman and Sex Tourism Landscapes* explores female tourists interactions with highly sexualized spaces and places in two very different contexts the Netherlands and Thailand Addressing this incongruence this text explores the ways in which these spaces are constructed and examines the different relations that govern the management of and female tourist interactions with these liminal sexual zones Ethnographic data collected in both countries suggests that far from being male centred spaces the red light districts and associated sexual entertainment venues are very much open to female tourists Drawing on this research the author argues that some women are indeed interested in exploring sexualized zones challenging assumptions about women s involvements with sexual space Thinking specifically about the visual nature of women s sexualized experiences the analysis draws on a range of different theoretical understandings that address power privilege and the gaze An important contribution to a range of debates this book will appeal to students and researchers in tourism geography sociology gender studies and cultural theory

Exploring the Earth's Crust C. Prodehl, Walter D. Mooney, 2012 This volume contains a comprehensive worldwide history of seismological studies of the Earth s crust using controlled sources from 1850 to 2005 Essentially all major seismic projects on land and the most important oceanic projects are covered The time period 1850 to 1939 is presented as a general synthesis and from 1940 onward the history and results are presented in separate chapters for each decade with the material organized by geographical region Each chapter highlights the major advances achieved during that decade in terms of data acquisition processing technology and interpretation methods For all major seismic projects the authors provide specific details on field observations interpreted crustal cross sections and key references They conclude with global and continental scale maps of all field measurements and interpreted Moho contours An accompanying DVD contains important out of print publications and an extensive collection of controlled source data location maps and crustal cross sections Publisher s description *Ark of the Broken Covenant* John Charles Kunich, 2003-02-28 Blending scientific and legal expertise Kunich proves that a devastating ecological crisis is imminent or even underway already and that conservation law has yet to catch up with biological science He challenges readers with a hotspots wager arguing that he have vastly more to gain than lose by legally protecting biological hotspots and that foregoing them in favor of the relatively minor and immediate returns arising from their devastation is both foolish and ultimately dangerous Legal thought lags behind modern science in focusing on and setting priorities for global conservation An extinction spasm is imminent many scientists argue due to the ongoing global devastation of biological hotspots home to a disproportionate share of all life forms including perhaps millions of unknown species These hotspots have already lost 88 percent of their primary vegetation and are likely to lose much more yet few legal measures exist to protect them Environmental legal protections are often incomprehensive and feebly enforced Even worse 62 percent of all hotspots are unprotected Kunich provides a brief history and science of extinction He discusses the

importance of saving species from extinction and analyzes the legal measures directed toward preserving biodiversity in nations that harbor hotspots **Forthcoming Books** Rose Army,2002-02 **Sustainability as a Multi-criteria Concept** Luis Diaz-Balteiro,Jacinto González-Pachón,Carlos Romero,2020-11-23 Sustainability is a fairly old concept born in the 18th century in the field of forestry within a mono functionality perspective The concept has considerably evolved in the last few years towards a multi functionality context with applications reported in practically all areas of economic interest On the other hand modern sustainability is a complex problem for two reasons a The multiplicity of functions of a very different nature involved in the process and b The manner in which different segments of the society or stakeholders perceive the relative importance of these functions For the above reasons a realistic approach for dealing with the sustainability issue requires taking into consideration multiple criteria of different nature economic environmental and social and in many cases within a participatory decision making framework This book presents a collection of papers dealing with different theoretical and applied issues of sustainability with the help of a modern multi criteria decision making theory with a single as well as several stakeholders involved in the decision making process Hopefully this material will encourage academics and practitioners to alter their research in this hot and vital topic After all the sustainable management of the environment and its embedded resources is one of the most important if not the major challenge of the 21st century **Ambient Intelligence** Werner Weber,Jan Rabaey,Emile H.L. Aarts,2005-03-04 Ambient intelligence is the vision of a technology that will become invisibly embedded in our natural surroundings present whenever we need it enabled by simple and effortless interactions attuned to all our senses adaptive to users and context sensitive and autonomous High quality information access and personalized content must be available to everybody anywhere and at any time This book addresses ambient intelligence used to support human contacts and accompany an individual s path through the complicated modern world From the technical standpoint distributed electronic intelligence is addressed as hardware vanishing into the background Devices used for ambient intelligence are small low power low weight and very importantly low cost they collaborate or interact with each other and they are redundant and error tolerant This means that the failure of one device will not cause failure of the whole system Since wired connections often do not exist radio methods will play an important role for data transfer This book addresses various aspects of ambient intelligence from applications that are imminent since they use essentially existing technologies to ambitious ideas whose realization is still far away due to major unsolved technical challenges World in Transition 4 German Advisory Council On Global Change (Wbgu),2013-09-13 At the start of the 21st century fighting poverty and protecting the environment are two of the most urgent challenges facing the international community Environmental changes will jeopardize people s survival to an even greater extent in the future and will hit the poor hardest To meet these challenges it will be essential to breathe new life into the partnership between industrialized and developing countries It will be equally essential to combine poverty reduction with environmental protection in an integrated

policy structure spanning all levels from local to global In this report the German Advisory Council on Global Change WBGU shows that global environmental policy is a prerequisite for global poverty reduction WBGU analyses the relevant policy processes and delivers recommendations charting the way forward With its interdisciplinary approach providing a complex and systematic analysis of the poverty environment nexus WBGU s latest report breaks new ground Indira Gandhi s old convenient maxim was Poverty is the biggest polluter Put forward at the 1972 UN Conference on the Human Environment in Stockholm it has been sorely misused ever since to override environmental precaution and prioritize economic development strategies instead The new WBGU report maps out a way to shape a coherent environment and development policy This report revitalizes the Rio spirit and gives it a robust scientific base Prof Dr Ernst Ulrich von Weizsäcker Member of the German Bundestag MdB
