[The Botanizers](#) Elizabeth B. Keeney, 2000-11-09 Keeney examines the role of botany in the lives of nineteenth-century botanizers: amateur scientists who collected, identified, and preserved plant specimens as a pastime. Using popular magazines, fiction, and autobiographies of the day, she explores the popular culture of this avocation, which attracted both men and women by the thousands.

The Cambridge History of Science: Volume 4, Eighteenth-Century Science David C. Lindberg, Roy Porter, Ronald L. Numbers, 2003-03-17 The fullest and most complete survey of the development of science in the eighteenth century.

Claiming Indigenous Plant Knowledge Carey McCormack, 2024-11-30 *Claiming Indigenous Plant Knowledge: From Botanical Exchanges to Resource Extraction in the Indian Ocean World* examines the collection and documentation of the natural world's development over the course of the nineteenth century into a vast network of scientists who attempted to categorize and understand nature, particularly in the botanically rich Indian Ocean. But the process of collecting plants and exchanging knowledge about the natural world went far beyond the labor of botanists and naturalists. Naturalists depended on many groups for regional knowledge and local information about the uses, names, and value of plants. Publications and archival materials included local and indigenous knowledge of nature, but as exploration led to colonial expansion, and botany became a professional science, local and indigenous knowledge moved to the periphery of botanical writing. Local knowledge never stopped being important, but the act of discovery and the claiming, perhaps even colonization, of botanical knowledge became the limited sphere of professional botanists. Indigenous peoples involved in the early days of collecting never stopped their activities, but professionals failed to

acknowledge their labor and expertise By the end of the century colonial administrations used botanic information collected by professionals to convert colonies into natural resource extraction zones This shift disrupted indigenous lifeways in the Indian Ocean World and led to environmental issues facing the region today Innovators in Battery Technology Kevin Desmond,2016-06-03 As the world s demand for electrical energy increases it will be the ingenuity and skill of brilliant electrochemists that enable us to utilize the planet s mineral reserves responsibly This biographical dictionary profiles 95 electrochemists from 19 nations who during the past 270 years have researched and developed ever more efficient batteries and energy cells Each entry traces the subject s origin education discoveries and patents as well as hobbies and family life The breakthroughs of early innovators are cataloged and the work of living scientists and technicians is brought up to date An appendix provides a cross referenced timeline of innovation
