philosophers from Aristotle through Kant and Hegel to Arno Leopold Iris Murdoch Mary Midgley and Lars Svendsen this book demonstrates the narrative strategies employed to engage young readers as moral agents **Multicultural Education** ,1994 **Student Cheating and Plagiarism in the Internet Era** Kathleen Foss,Ann Lathrop,2000-06-15 The Internet high tech calculators and other technological advances have made student cheating easier and more common than ever before This book helps you put a stop to high tech and more traditional low tech forms of cheating and plagiarism Learn to recognize the danger signs for cheating and how to identify material that has been copied Sample policies for developing academic integrity reproducible lessons for students and faculty and lists of helpful online and print resources are just some of the features of this important guide A must read for concerned educators administrators and parents **Education in Morality** J. Misfit Children Markus Bohlmann,2016-12-14 Misfits are often confused with outcasts Yet misfits rather find themselves in between that which fits and that which does not This volume is interested in this slipperiness of misfits and explores the blockages and the promises of such movements as well as the processes and conditions that produce misfits the means that enable them to undo their denomination as misfits and the practices that turn those who fit into misfits and vice versa This collection of essays on misfit children produces transmissible motions across and engages in scholarly conversations that unfold betwixt and between in order to make rigid concepts twist and twirl and ultimately fail to fit **From Clinic to Classroom** Howard Radest,2000-03-30 The current development of biomedical ethics is a source of radical critique not only in the clinic but also in the classroom This volume argues that today s moral education is too abstract to be effective and would benefit from the adoption of the practical approach which is typical of biomedical ethics thinking with cases In presenting this approach Radest explores various issues of moral epistemology and advocates the urgency of realism and decision in ethics The use of a rich and complex literature drawn from biomedical ethics pedagogy and philosophy serves to stimulate the reader to think through the moral complexity and ambivalence of modern experience **Drama, Narrative and Moral Education** Joe Winston,2005-06-21 The author explores how to approach moral education for children He provides case studies to illustrate a classroom approach that uses both drama and narrative stories to explore moral issues

Women Writers of Children's Classics Mary Sebag-Montefiore,2008 Annotation A lively study of the work of four major 19th century women writers of children s books Juliana Ewing Louisa Molesworth Frances Hodgson Burnett and Edith Nesbit Ethical and Inclusive Research with Children Roseanna Bourke,2020-04-02 The imperative to include children and

young people in educational research and in more participative ways is educationally important when exploring policy and practice contexts. It is also critical to recognise that children have the right to contribute to debates and can express their views through educational research on matters that affect them. However, the freedom to research alongside young people is only afforded if we continue to unmask the illusion that well intentioned research is always ethical. This book presents an international set of storied experiences where researchers have been challenged and have changed the way they think incorporating and exploring ethics in research. The contributors highlight the ethical dilemmas that can arise when children and young people are included in research agendas and their reflexive approaches to these dilemmas include being responsive to the cultural, political and social contexts of the lives of the children and developing child friendly research approaches to ensure their voice is accessed in multiple ways. These solution focused and local approaches facilitate a more ethical deliberative process where the establishment of trust is central to an ethical engagement with young people and their families and where the explication of ethical dilemmas can improve research practice. This book is a critical resource for researchers and practitioners researching with and alongside children and young people. This book was originally published as a special issue of the *International Journal of Inclusive Education*. *Thinking Through Ethics and Values in Primary Education* Gianna Knowles, Vini Lander, Sally Hawkins, Carol Hughes, Glenn Stone, Linda Cooper, Barbara Thompson, 2012-05-18. *Thinking Through Ethics and Values in Primary Education* is an accessible text that encourages readers to explore deeply the ethics and values surrounding primary education. The text helps the reader to critically reflect on the principles that underpin education. Specifically written for education students in the later years of their course, the text draws on research and practice to explore the challenges and opportunities involved while helping to develop the reader's own critical thinking skills. The book begins by asking what are ethics and values and goes on to explore social diversity and society and education. It considers ethics and values and the curriculum, school organisation and the classroom. A chapter on ethics, values and the teacher encourages the reader to examine their own thoughts about education. Throughout, practical guidance runs alongside structured critical thinking exercises to help the reader and reflect on both theory and practice. About the Series *Thinking Through Education* is a new series of texts designed and written specifically for those education students entering the second or final phase of their degree course. Structured around sets of specific skills, each chapter uses critical thinking and reflective exercises to develop greater subject knowledge and critical awareness.

Young Children as Active Citizens Patrick Hughes, Glenda Mac Naughton, Kylie Smith, 2009-10-02. *Young Children as Citizens* explores how young children, birth to 12 years of age, can and should participate in civic life. It reflects new images of young children as social actors together with the increased interest in children's rights in the public sphere. The contributors are early childhood researchers, pedagogues, children and policy makers from Australia and Europe. They present a rich diversity of research based case studies in which policy makers and educators have listened to young children's views on public issues.

and responded in respectful and ethical ways Young Children as Citizens is a unique resource for policy makers those working in children's services and child advocates It shows how best to consult young children and it presents a range of arguments that consulting young children about policies and decisions that affect them supports and enhances a vigorous democratic society Students undergraduate and postgraduate teachers and researchers in early childhood studies can use individual chapters of Young Children as Citizens selectively to explore issues of increasing complexity in different courses The book would be a good set text for Honours and Master's programs that address issues of children's rights

studies children's literature and education research *Ethical Research with Children* Sarah Richards, Jessica Clark, Allison Boggis, 2015-10-26 An increasing interest in children's lives has tested the ethical and practical limits of research. Rather than making tricky ethical decisions transparent, researchers tend to gloss over stories that do not fit with sanitized narratives. This book aims to fill this gap by making explicit the lived experiences of research with children. **Liberalism, Human Values and Schools as Microcosms of Society** Martin Cohen, 2025-03-31 This seminal volume provides an accessible overview of key ethical and philosophical debates surrounding contemporary education policy, advocating for a future in education that is primarily driven by prioritising social values. Grounded in the educational ideas of recent British liberal and philosophical thinkers including Roger Scruton, Mary Midgley and Brenda Almond, in particular, the book provides a deeper understanding of the importance of intellectual and moral freedom as it plays out in today's schools. The book echoes Almond's call for education to be viewed through the lens of social values and argues for a broader societal strategy to the philosophy of education than narrowly utilitarian attempts to prepare pupils for the labour market. Chapters present various debates in society that relate to liberalism, social values and utilitarianism and ultimately encourage dialogue on the approach towards education that is necessary to create a socially adjusted, thoughtful and genuinely knowledgeable society of the future. By encouraging readers to think about the requirements of the schools of tomorrow along with their role in shaping both individual lives and society itself, this book will be of interest to scholars, postgraduate students and researchers in the fields of philosophy of education, education studies and moral and value education. Those interested in the sociology of education and citizenship studies more broadly will also benefit from the volume.
