Secularization in the Long 1960s Clive D. Field, 2017-03-16 *Secularization in the Long 1960s* Numerating Religion in Britain provides a major empirical contribution to the literature of secularization It moves beyond the now largely sterile and theoretical debates about the validity of the secularization thesis or paradigm Combining historical and social scientific perspectives Clive D Field uses a wide range of quantitative sources to probe the extent and pace of religious change in Britain during the long 1960s In most cases data is presented for the years 1955-80 with particular attention to the methodological and other challenges posed by each source type Following an introductory chapter which reviews the historiography introduces the sources and defines the chronological and other parameters Field provides evidence for all major facets of religious belonging behaving and believing as well as for institutional church measures The work engages with and largely refutes Callum G Brown's influential assertion that Britain experienced revolutionary secularization in the 1960s which was highly gendered in nature and with 1963 the major tipping point Instead a more nuanced picture emerges with some religious indicators in crisis others continuing on an existing downward trajectory and yet others remaining stable Building on previous research by the author and other scholars and rejecting recent proponents of counter secularization the long 1960s are ultimately located within the context of a longstanding gradualist and still ongoing process of secularization in Britain
