Design Samples for Books Robin Brooks,2018-09-29 First and foremost this is a booklet to explore printing with CreateSpace Secondly it displays A Few Chapter Opening Treatments as a possible starting off point for authors and clients of personal historians to get a sense of how their book might look On the page following each chapter opening here you will find noted the size of that book along with a large letter labelling that design if for some reason you d like to refer to it In the chapter entitled Images of Various Resolutions I am exploring how black and white color and false duotone images images created with CMYK that appear as if they have been created using Black and a second color print in Create Space using 300dpi 450dpi and 600dpi I created this first for my own benefit as a test using a casual design so that I might execute my own and clients books for CreateSpace the best I can Then my sister had the idea to also use this as a place to showcase a smattering of chapter openings as an offering for a less expensive design path as these have already been created hence part of the design time would be alleviated In any case I hope this book may be of use to you
